Answers to selected exercises - Chapter 5

Exercise 5.1

- a. The essential conditions for b to be unbiased for β are that $E\{e_i\} = 0$ and that $\{x_1, \dots, x_N\}$ is independent of $\{e_1, \dots, e_N\}$; see Subsection 2.3.2. The essential condition for b to be consistent is $E\{e_i x_i\} = 0$ (plus some regularity conditions). An estimator that is unbiased provides, in repeated sampling, an estimate that is – on average – equal to the true value. That is, we do not expect the estimator to be systematically too high or too low, no matter how big or small the sample is. An estimator is consistent if its probability limit is equal to the true value. That is, the probability that the estimator differs from the true value becomes infinitesimally small when the sample size becomes infinitely large. While we hope that the estimator does not systematically under- or overestimate the true value when the sample size is reasonably large, this result is only true in the limit.

- b. We can write $E\{e_i x_i\} = 0$ as

$$E\{(y_i - x_i' \beta) x_i\} = 0.$$

This is a set of moment conditions as the expression in curly brackets is a function of observable data and unknown parameters. A method of moments estimator is obtained by taking the sample equivalent of the above expectations, setting it to zero and then solving for the unknown parameters. This reproduces the OLS estimator b .

- c. One example is the case of endogenous regressors: the regressor x_{i2} is jointly determined with y_i (or the same unobservables affect both x_{i2} and y_i). An empirical example is the estimation of the returns to schooling: the level of schooling is typically related to the same unobservables (ability, intelligence) that also affect a person's wage. A second example is measurement error in the regressor x_{i2} (see Subsection 5.2.2).
- d. No. If $E\{e_i x_i\} \neq 0$ the OLS estimator is biased and inconsistent, no matter what other assumptions we are making. Correcting standard errors does not solve the problem.
- e. An instrumental variable, z_i , say, gives rise to a new moment condition that can replace the invalid one. In this case, we have the following three moment conditions:

$$\begin{aligned} E\{(y_i - x_i' \beta)\} &= 0, \\ E\{(y_i - x_i' \beta) x_{i2}\} &= 0, \\ E\{(y_i - x_i' \beta) z_i\} &= 0. \end{aligned}$$

Baum, 2006-08-17 Integrating a contemporary approach to econometrics with the powerful computational tools offered by Stata this introduction illustrates how to apply econometric theories used in modern empirical research using Stata The author emphasizes the role of method of moments estimators hypothesis testing and specification analysis and provides practical examples that show how to apply the theories to real data sets The book first builds familiarity with the basic skills needed to work with econometric data in Stata before delving into the core topics which range from the multiple linear regression model to instrumental variables estimation *Limitations of contract farming as a pro-poor strategy: The case of maize outgrower schemes in upper West Ghana* Ragasa,

Catherine, Lambrecht, Isabel, Kufoalor, Doreen S., 2017-03-30 The focus in this paper is on two relatively large maize based contract farming CF schemes with fixed input packages Masara and Akate and a number of smaller and more flexible CF schemes in a remote region in Ghana Upper West Results show that these schemes led to improved technology adoption and yield increases In addition a subset of maize farmers with high yield improvements due to CF participation had high gross margins However on average yields were not high enough to compensate for higher input requirements and cost of capital On average households harvest 29 30 bags 100 kg each or 2 9 3 0 metric tons of maize per hectare and the required repayment for fertilizer seed herbicide and materials provided under the average CF scheme is 21 25 bags 50 kg each per acre or 2 6 3 0 tons per hectare which leaves almost none for home consumption or for sale Despite higher yields the costs to produce 1 ton of maize under CF schemes remain high on average higher than on maize farms without CF schemes more than twice that of several countries in Africa and more than seven times higher than that of major maize exporting countries the United States Brazil and Argentina Sustainability of these CF schemes will depend on from the firms perspective minimizing the costs to run and monitor them and from the farmers perspective developing and promoting much improved varieties and technologies that may lead to a jump in yields and gross margins to compensate for the high cost of credit

Peasants in Power Philip Verwimp, 2013-06-03 This book shows how Rwanda s development model and the organisation of genocide are two sides of the same coin In the absence of mineral resources the elite organised and managed the labour of peasant producers as efficient as possible In order to stay in power and benefit from it the presidential clan chose a development model that would not change the political status quo When the latter was threatened the elite invoked the preservation of group welfare of the Hutu called for Hutu unity and solidarity and relied on the great mass rubanda nyamwinshi for the execution of the genocide A strategy as simple as it is horrific The genocide can be regarded as the ultimate act of self preservation through annihilation under the veil of self defense Why did tens of thousands of ordinary people massacred tens of thousands other ordinary people in Rwanda in 1994 What has agricultural policy and rural ideology

to do with it What was the role of the Akazu the presidential clan around president Habyarimana Did the civil war cause the genocide And what insights can a political economy perspective offer Based on more than ten years of research and engaging with competing and complementary arguments of authors such as Peter Uvin Alison Des Forges Scott Strauss Ren Lemarchand Filip Reyntjens Mahmood Mamdani and Andr Guichaoua the author blends economics politics and agrarian studies to provide a new way of understanding the nexus between development and genocide in Rwanda Students and practitioners of development as well as everyone interested in the causes of violent conflict and genocide in Africa and around the world will find this book compelling to read
