hundredth anniversary of the Louisiana Purchase agreement and of the organization of the Lewis and Clark expedition Volume VI explains how modern Missouri bridged the years between the mid twentieth century and the new millennium Central to the period was the end of segregation the demise of bossism in Kansas City and St Louis changes in the economy and the impact of cross state urbanization Among other developments were the building of the interstate highways and the marked expansion of higher education Larsen's overall thesis is that during these years Missouri continued to advance in a restrained manner and at a moderate pace The Republican party revived suburbs mushroomed around the central cities the state government grew and expanded its functions the population became more diversified concerns increased for the natural and built environments higher education was transformed small towns held their own and the state declined as a force in national politics A History of Missouri Volume VI 1953 to 2003 is very much a pioneering effort and one that should be welcomed by anyone interested in the history of Missouri from casual observers to policymakers Trans-Mississippi West, 1804-1912: A guide to records of the Department of the Interior for the territorial period. section 1.
