A History of Science, Technology and Philosophy in the 18th Century. Vol. 2 (2nd Ed.). Abraham Wolf, A History of Science, Technology and Philosophy in the 18th Century, Vol 1 & 2 A. Wolf, 1961 A History of Science, Technology, & Philosophy in the 18th Century : Vol II. A. Wolf, 1961 **A History of Science Technology and Philosophy in the 18th Century** Abraham Wolf, 2019-04-23 Published in 1938 The new volume presents a full and profusely illustrated account of progress made during the eighteenth century in Mathematics Mechanics Astronomy Physics Meteorology Geography Chemistry Biology Medicine Psychology Demography Economics Philosophy and Technology *The Cambridge History of Science: Volume 4, Eighteenth-Century Science* David C. Lindberg, Roy Porter, Ronald L. Numbers, 2003-03-17 The fullest and most complete survey of the development of science in the eighteenth century **The Correspondence of James Jurin (1684-1750)** Andrea A. Rusnock, 2020-01-29 James Jurin 1684 1750 occupied a central place in the medical and scientific circles of Augustan and Georgian England His dispassionate yet forceful advocacy of smallpox inoculation using an innovative statistical approach brought him widespread recognition both in Britain and abroad He was Secretary to the Royal Society for seven years and participated vigorously in the most important scientific debates of the period Jurin s correspondence recently made available to the public provides rich material for the study of eighteenth century natural philosophy and medicine especially of the smallpox inoculation debates This volume reproduces a broad and valuable selection of letters as well as a list of Jurin s publications and a calendar of the complete correspondence The introductory biographical essay describes how Jurin combined a career as a successful London physician with that of a natural philosopher *The Cambridge History of Literary Criticism: Volume 4, The Eighteenth Century* H. B. Nisbet, Claude Rawson, 2005-12-08 This is a comprehensive 1997 account of the history of literary criticism in Britain and Europe between 1660 and 1800 Unlike previous histories it is not just a chronological survey of critical writing but a multidisciplinary investigation of how the understanding of literature and its various genres was transformed at the start of the modern era by developments in philosophy psychology the natural sciences linguistics and other disciplines as well as in society at large In the process modern literary theory at first often implicit in literary texts themselves emancipated itself from classical poetics and rhetoric and literary criticism emerged as a full time professional activity catering for an expanding literate public The volume is international both in coverage and in authorship Extensive bibliographies provide guidance for further specialised study Epistemology and Natural Philosophy in the 18th Century Danilo Capecechi, 2020-08-25 This book documents the process of transformation from natural philosophy which was considered the most important of the sciences until the early modern era into modern disciplines such as mathematics physics natural history chemistry medicine and engineering It focuses on the 18th century which has often been considered uninteresting for the history of science representing the transition from the age of genius and the birth of modern science the 17th century to the age of prodigious development in

the 19th century Yet the 18th century the century of Enlightenment as will be demonstrated here was in fact characterized by substantial ferment and novelty To make the text more accessible little emphasis has been placed on the precise genesis of the various concepts and methods developed in scientific enterprises except when doing so was necessary to make them clear For the sake of simplicity in several situations reference is made to the authors who are famous today such as Newton the Bernoullis Euler d Alembert Lagrange Lambert Volta et al not necessarily because they were the most creative and original minds but mainly because their writings represent a synthesis of contemporary and past studies The above names should therefore be considered more labels of a period than references to real historical characters **The Cambridge**

Cavendish Christa Jungnickel, Russell McCormmach, 1996 The Cavendishes flourished during the high tide of British aristocracy following the revolution of 1688-89 and the case can be made that this aristocracy knew its finest hour when Henry Cavendish gently laid his delicate weights in the pan of his incomparable precision balance For this it took two generations and two kinds of invention one in social forms and the other in scientific technique This biography tells how it came to pass Book jacket
