

Chinese Mathematics

Chinese mathematics has developed greatly since at least 100 BC. Although the Chinese refer back to their ancient texts, many of which were written on strips of bamboo, they are constantly coming up with ways of working out problems. One of the earliest Chinese mathematicians was a man named Luoxia Hong (130BC – 30BC). He designed a new calendar for the Emperor, which featured 12 months, based on a cycle of 12 years. This inspired many people to design calendars and the one we have today.

The Chinese also came up with a rule called the Gougu Rule. This is the Chinese version of Pythagoras. Liu Hui (220AD – 280AD) tried to find pi to the nearest number. He eventually got to 3.14159, which in those days was thought to be an incredible achievement.
