## **A Long Time In Making The History Of Smiths:**

**A Long Time in Making** James Nye, 2014 Smiths Group formerly Smiths Industries part of the UK FTSE 100 index is a global engineering company with a market capitalisation over £5bn. Evolving from beginnings in the Victorian jewellery trade to significant market presences in the twentieth century motor accessory clock and watch industries it has reinvented itself again as a diversified international company operating in the medical communications security and engineered components sectors. Its narrative history illuminating the reasons for its survival and adaptability offers useful data and information to aid wider research into questions such as the legitimacy of conglomerates as a business model, the creation and maintenance of corporate culture, issues of succession, the effects of mergers and the questionable value placed upon targeted synergies, even the role of serendipity. The story begins with several generations of the Smith family amassing a fortune in retail and then following a 1914 stock market flotation describes the transition from family run business to the development of a professionally run managerial enterprise. Since the 1970s it has had to face the decline of major markets and competitive pressures leading to the adoption of new business lines, globalisation and the internationalisation of its workforce. It now has 23 000 employees across more than 50 countries, along the way shocking the markets by abandoning core businesses and undergoing a controversial merger. Unfettered access to company records and interviews with former staff members provide insights into the strategy and management of the firm, illuminating the rich culture of Smiths characterised by the frequent fostering of technical brilliance and a cast of larger than life characters. *British Domestic Synchronous Clocks 1930-1980* Leslie Philip Pook, 2015-01-20 This book complements available one make books on domestic synchronous clocks. It is also a history of science book that sets British domestic synchronous clocks, their manufacturers and technology in their social context. Part I covers the historical background, British domestic synchronous clock manufacturers and brands, how synchronous clocks work, domestic synchronous clock cases, practical advice on the servicing of domestic synchronous clocks and analysis of the marketing and reliability of British domestic synchronous clocks. This analysis provides an explanation of the rise and eventual fall of their technology. Part II contains galleries of a selection of British domestic synchronous clocks and of the movements with which they are fitted. There is a front and back view of each clock together with a brief description. Views of each movement include views with the movement partly dismantled together with a brief technical description of the movement. This profusely illustrated book is primarily for fellow enthusiasts and is based on an extensive archive of information on domestic synchronous clocks, their movements and their manufacturers. Current electrical regulations mean that professional clockmakers are reluctant to repair synchronous clocks. In fact, provided that they have not been mistreated, synchronous clocks are usually reliable and quite easy to maintain. *A History of Time* Paul R. *The Rise and Decline of England's Watchmaking Industry, 1550-1930* Alun C. Davies, 2022-04-11 This survey of the rise and decline of English watchmaking fills a gap in the historiography of British industry. Clerkenwell in London was supplied with rough movements from Prescott 200 miles away in Lancashire. Smaller watchmaking hubs later emerged in Coventry Liverpool and Birmingham. The English industry led European watchmaking in the late eighteenth century in output and its lucrative export markets extended to the Ottoman Empire and China. It also made marine chronometers the most complex of hand-crafted pre-industrial mechanisms crucially important to the later hegemony of Britain's navy and merchant marine. Although Britain was the workshop of the world its watchmaking industry declined. Why? First because cheap Swiss watches were smuggled into British markets. Later in the era of Free Trade they were joined by machine-made watches from factories in America enabled by the successful application to watch production of the American system in Waltham Massachusetts after 1858. The Swiss watch industry adapted itself appropriately expanded and reasserted its lead in the world's markets. English watchmaking did not its trajectory foreshadowed and was later followed by other once prominent British industries. Clerkenwell retained its pre-industrial production methods. Other modernization attempts in Britain had limited success or failed.
