Studies, 4 Volume Set Sharon Macdonald, Helen Rees Leahy, 2015-07-20 The International Handbooks of Museum Studies is a multi volume reference work that represents a state of the art survey of the burgeoning field of museum studies

Featuring original essays by leading international museum experts and emerging scholars readings cover all aspects of museum theory practice debates and the impact of technologies The four volumes in the series divided thematically offer in depth treatment of all major issues relating to museum theory historical and contemporary museum practice mediations in art design and architecture and the transformations and challenges confronting the museum In addition to invaluable surveys of current scholarship the entries include a rich and diverse panoply of examples and original case studies to illuminate the various perspectives Unprecedented for its in depth topic coverage and breadth of scholarship the multi volume International Handbooks of Museum Studies is an indispensable resource for the study of the development roles and significance of museums in contemporary society **New Collecting: Exhibiting and Audiences after New Media Art** Beryl

Graham, 2016-04-29 The collections of museums galleries and online art organisations are increasingly broadening to include more new media art Because new media is used as a means of documenting archiving and distributing art and because new media art might be interactive with its audiences this highlights the new kinds of relationships that might occur between audiences as viewers participants selectors taggers or taxonomisers New media art presents many challenges to the curator and collector but there is very little published analytical material available to help meet those challenges This book fills that gap Drawing from the editor's extensive research and the authors expertise in the field the book provides clear navigation through a disparate arena The authors offer examples from a wide geographical reach including the UK North America and Asia and integrate the consideration of audience response into all aspects of their work The book will be essential reading for those studying or practicing in new media curating or museums and galleries **Museum Space** Kali Tzortzi, 2016-03-09

Museums are among the iconic buildings of the twenty first century as remarkable for their architectural diversity as for the variety of collections they display But how does the architecture of museums affect our experience as visitors This book proposes that by seeing space as common ground between architecture and museology and so between the museum building and its display we can illuminate the individuality of each museum and the distinctive experience it offers for example how some museums create a sense of personal exploration while others are more intensely didactic and how the visit in some cases is transformed into a spatial experience and in other cases into a more social event The book starts with an overview of the history of museum buildings and display strategies and a discussion of theoretical and critical approaches It then focuses

on specific museums as in depth case studies and uses methods of spatial analysis to look at the key design choices available to architects and curators and their effects on visitors behaviour Theoretically grounded methodologically original and richly illustrated this book will equip students researchers and professionals in the fields of architecture museum studies curating exhibition design and cultural studies with a guide for studying museums and a theoretical framework for their interpretation
