Propulsion Systems - Recent Advances, New Perspectives and Applications Longbiao Li,2023-10-11 Propulsion systems play an important role in civil and military applications New designs new materials and new technologies have already been applied to propulsion systems to improve power and decrease energy consumption This book focuses on the recent progress in propulsion system development for different applications in fields such as aerospace and marine industries as well as for high speed trains and other vehicles 2023 Asia-Pacific International Symposium on Aerospace Technology (APISAT 2023) Proceedings Song Fu,2024-07-04

This book is a compilation of peer reviewed papers from the 2023 Asia Pacific International Symposium on Aerospace Technology APISAT2023 The symposium is a common endeavour among the four national aerospace societies in China Australia Korea and Japan namely Chinese Society of Aeronautics and Astronautics CSAA Royal Aeronautical Society Australian Division RAeS Australian Division Japan Society for Aeronautical and Space Sciences JSASS and Korean Society for Aeronautical and Space Sciences KSAS APISAT is an annual event initiated in 2009 It aims to provide the opportunity to Asia Pacific nations for the researchers of universities and academic institutes and for the industry engineers to discuss the current and future advanced topics in aeronautical and space engineering This is the volume II of the proceedings Integrated Systems Engineering G. Johannsen,2014-05-23

A key solution for present and future technological problems is an integration systems approach The challenging cross discipline of integrated systems engineering is perhaps more easily accepted and implemented in the organizational structures of industries than in academia The opportunity for both sides leading researchers and industrial practitioners in this field to exchange ideas concepts and solutions has been provided at the IFAC symposia on integrated systems engineering This postprint volume contains all those papers which were presented at the symposia including the three plenary papers and the papers of the case study session as well as the summaries of the three discussion sessions **Advances in Simulation of Wing and Nacelle Stall** Rolf

Radespiel,Reinhard Niehuis,Norbert Kroll,Kathrin Behrends,2015-07-09 The book reports on advanced solutions to the problem of simulating wing and nacelle stall as presented and discussed by internationally recognized researchers at the Closing Symposium of the DFG Research Unit FOR 1066 Reliable simulations of flow separation on airfoils wings and powered engine nacelles at high Reynolds numbers represent great challenges in defining suitable mathematical models computing numerically accurate solutions and providing comprehensive experimental data for the validation of numerical simulations Additional problems arise from the need to consider airframe engine interactions and inhomogeneous onset flow conditions as real aircraft operate in atmospheric environments with often large distortions The findings of fundamental and applied research into these and other related issues are reported in detail in this book which targets all readers academics and professionals alike interested in the development of advanced computational fluid dynamics modeling for the simulation

of complex aircraft flows with flow separation
