Die aus vier Mitgliedern bestehende A320-Familie (A318, A319, A320, A321) leistet den wichtigsten Beitrag für den Erfolg von Airbus als Flugzeughersteller, wovon die A320 mit 150 Sitzplätzen das meistgekaufte Flugzeug dieser Familie ist. Das A320-Programm wurde im März 1982 initiiert und der Erstflug fand am 22. Februar 1987 statt. Erstmalig ausgeliefert im Juni 1988, leistete die A320 Pionierarbeit für den Einsatz von digitalen Fly-by-Wire-Flugkontrollsystemen in Verkehrsflugzeugen. Es wurden zwei Treibwerke angeboten, das CFM56 und das V2500. Mit mehr als 3.000 hergestellten Flugzeugen ist die A320-Familie die zweitbest verkaufte Flugzeugfamilie aller Zeiten, direkt nach der größten, der Boeing 737-Familie.

Im Hinblick auf die Gesamtzahl der beförderten Gäste, ist Lufthansa die größte Fluggesellschaft in Europa, die zweitgrößte Fluggesellschaft ist Air France. KLM ist die deutsche Flagcarrier. Der Name des Unternehmens wurde hergeleitet durch die Wörter Luft und Hansa (benannt nach der Hanse, einer mächtigen und Handel treibenden Vereinigung im Mittelalter). Die Fluggesellschaft ist hinsichtlich der gesamten Anzahl an beförderten Passagieren die fünftgrößte Fluggesellschaft der Welt und bietet ihre Dienste zu 209 Destinationen in 81 Ländern an. Gemeinsam mit ihren Partnern fliegt Lufthansa mehr als 410 Destinationen an. Die Lufthansa ist ein Gründungsmitglied der Star Alliance, der weltweit größten Luftfahrtallianz. Die Star Alliance wurde 1997 zusammen mit Thai Airways, United Airlines, Air Canada und Scandinavian Airlines System gegründet. Die Star Alliance besteht derzeit aus 20 Fluggesellschaften und 3 regionalen Mitgliedern. Lufthansa betreibt neben 20 x A319 und 3 x A321 über 36 x A320-300 (s. 14. Kapitel) und 11 Flugzeugen (A320neo, A320XLR) die größten Teile für Flüge innerhalb Europas eingesetzt werden, die A321 aber auch in Nordafrika und im Nahen Osten.

The A320 family (A318, A319, A320 & A320XLR) is the most important contributor to Airbus success as an aircraft manufacturer, with the 150 seat A320 being the best selling member of this family. The A320 program was launched in March 1982, and the first flight occurred on February 22 1982. First delivered in 1988, the A320 pioneered the use of digital fly-by-wire flight control systems in a commercial aircraft. Two engines are offered, the CFM56 and IAE V2500. With more than 3,000 aircraft of the A320 family built, it is the second best-selling aircraft in the world. Time after the family's popularity continues to grow. Boeing 737.

Lufthansa is the largest airline in Europe in terms of overall passengers carried (second is Air France - KLM), and the flag carrier of Germany. The name of the company is derived from Luf (the German word for "air"), and Hansa (after Hanseatic League, the powerful medieval trading group). The airline is the world's fifth largest airline in terms of overall passengers carried, operating services to 209 destinations in 81 countries. Together with its partners Lufthansa services over 410 destinations. Lufthansa is a founding member of Star Alliance, the world's largest airline alliance. Star Alliance was formed in 1997 together with Thai Airways, United Airlines, Air Canada and Nordavia in the SkyTeam System. Star Alliance has now 20 member airlines in 3 Systems.

Lufthansa has 36x A320-200 (+ 14x on order) in its inventory, aside 20x A319 and 31x A321 and uses them mainly for flight within European countries, additionally the A321 in North Africa and the Middle East.

Moody's Bank and Finance Manual ,1996 *Management of Uncertainty* Gudela Grote, 2009-09-17 As I write the financial systems of the world are collapsing with still no clear indication of what the consequences will be and which measures should be taken to avoid such a crisis in the future There seems to be agreement though that the financial instruments introduced in the past few decades entailed far too much complexity and uncertainty and that there was too little regulatory control over the use of these instruments Management of uncertainty with the aim of achieving self control is the core concern of this book It was not written with a focus on financial systems but many concepts developed in this book are applicable to this field as well The neric principles of reducing maintaining or increasing uncertainties in view of the different contingencies an organization is faced with the fundamental issue of how much control is possible and who should be in

control and the question of how much and what kind of regulation is necessary with the overall aim of finding an appropriate balance between system stability and flexibility are at the centre of heated debates on the future of finance The Smile-High Club Allan Zullo, Kathy Nelson, 2002 More than 18 million flights a year carry more than one billion passengers for business and for pleasure This of course leads to increased opportunities for humor in the skies Consider the pilot whose skills were questioned after a ride ended roughly After a particularly hard landing in Tampa the U S Airways pilot apologized over the public address system to the passengers The crew stood at the door to say goodbye to the passengers as they deplaned The pilot felt so bad about the landing he couldn't look anyone in the eye None of the passengers said anything derogatory until a sweet little lady walking with the help of a cane approached him Sonny she said right in his face Did we land or were we shot down Author Allan Zullo has produced some of the world's most notoriously funny books filled with astonishing but true stories With co author Kathy Nelson Zullo's latest entrant captures some of flying's best moments from the Northwest captain who had pizza delivered to a plane stuck on the tarmac to the Delta flight engineer who fell out the back exit of a taxiing jet Hey thanks for waiting for me he told the pilot who slowed to pick him up No problem answered the captain I like you From start to finish Air Schtick will keep readers laughing at some of aviation's most amazing antics
