**Operational Decision-making in High-hazard Organizations** Jan Hayes,2017-09-18 This book takes a fresh look at safety decision making by documenting and examining stories told by front line managers in three different high hazard industries a chemical plant a nuclear power station and an air navigation service provider From Piper Alpha to Deepwater Horizon accident analysis has stressed the importance of excellent decision making by those in charge out in the field Organizations rely critically on the judgement and experience of such senior operations personnel and yet these qualities are undervalued in a business environment that emphasises documentation and measurement Whilst operational managers are guided by rules they also draw on their own long experience and can formulate a situation specific line in the sand to apply the experience of the operating team to complex real world situations that rule writers may not have foreseen This volume refocuses our attention on the people who make these important decisions and the organizational processes that support the best choices Jan Hayes uses her multi disciplinary experience to draw together an account of safety decision making that is both technically robust and yet accessible to academics practitioners and regulators alike Readers will see that the stories retold in this book provide a way for operational managers to share their knowledge experience and expertise with each other and with us    [Beyond Intellect and Reasoning](#) Acres A Stowe,2022-03-31 The purpose of this book is to draw readers attention to various legal intricacies associated with deploying self directed artificial intelligence systems AIS particularly emphasizing the limits of the law vis vis liability problems that may emerge within third party contracts With the advent of today's ostensive Amazon Halo or Alexa consumers are having to conclude contracts e g sale of goods and distant financial services in much more complex cybernetic environments Generally with one party acting in the capacity of a human being while the other as an autonomous thing device AIS with capabilities well beyond that of humans representing the interests of others not just other humans Yet traditional jurisprudence is limited in scope for holding these systems legally accountable if they were to malfunction and cause harm Interestingly within the judicial system itself the use of AIS is more prevalent now

including within the criminal justice system in some jurisdictions In the United States for instance AIS algorithms are utilized to determine sentencing and bail processing Still jurists find themselves limited to traditional legal methodologies and tools when tackling novel situations brought about by these systems For example traditional strict liability concept as applied in tort law typically ties responsibility to the person s e g AIS developers influencing the decision making process In contract law particularly where third parties are concerned AIS are equated to tools for the purposes of traditional strict liability rules Thus binding anyone on whose behalf they would have acted irrespective of whether such acts were intentional or foreseeable
