Naturalist Histories Jamon Alex Halvaksz, Joshua A. Bell, 2024-03-31 From early explorers to contemporary scientists naturalists have examined island flora and fauna of Oceania discovering new species carefully documenting the lives of animals and creating work central to the image of Oceania These discoveries and exploratory moves have had profound local and global impacts Often however local knowledge and communities are silent in the ethologies and histories that naturalists produce This volume analyzes the ways that Indigenous and non Indigenous naturalists have made island natures visible to a wider audience their relationship with the communities where they work as well as the unique natures that they explore and help make In staking out an area of naturalist histories each contributor addresses the relationship between naturalists and Oceanic communities how these histories shaped past and present place and practices the influence on conservations and development projects and the relationship between scientific and indigenous knowledge The essays span across colonial and postcolonial frames tracing shifts in biological practice from the eighteenth and nineteenth century focus on taxonomy and discovery to the twentieth century disciplinary restructurings and new collecting strategies and contemporary concerns with biodiversity loss conservation and knowledge formation The production of scientific knowledge is typically seen in ethnographic accounts as oppositional contrasting Indigenous and western local and global objective and subjective Such dichotomous views reinforce differences and further exaggerate inequities in the production of knowledge More dangerously value distinctions become embedded in discussions of Indigenous identity rights and sovereignty Contributors acknowledge that these dichotomous narratives have dominated the approach of the scientific community while informing how social scientists have understood the contributions of Pacific communities The essays offer a nuanced gradient as historical narratives of scientific investigation in dialogue with local

histories and reveal greater levels of participation in the creation of knowledge The volume highlights how power infuses the scientific endeavor and offers a distinct and diverse view of knowledge production in Oceania Combining senior and emerging international scholars the collection will be of interest to researchers in the social sciences history as well as biology and allied fields Seven Rivers Vanessa Taylor,2025-09-23 A magisterial history of the seven rivers representing the great natural arteries running through civilization by virtue of the roles they have played in our shared and conflicted world history Every river deserves its own history The seven rivers in this narrative were chosen because they are major rivers that magnify the common qualities of these great natural arteries that run through civilization The Nile Danube Niger Mississippi Ganges Yangtze and Thames are all world rivers by virtue of the roles they have each played in our shared and conflicted world history They have served as the power bases for empires and have been fought over as frontiers Their river basins those great systems of tributaries and groundwater all flowing to the main river have been plundered for their gold timber salt oil rubber and their people Vast networks have been forged between these rivers such as the deadly middle passage of the slave trade linking the Congo and Mississippi basins And rivers themselves have always had their own logic their natural beauties their floods droughts water borne diseases their tendency to silt up and mutate into marshland their marshy subsidence below the cities of the unwary their changes of course tipping points and disappearances These rivers have shaped our lives just as we have shaped theirs What follows is the story of humanity in seven rivers Unpublished London Diaries Heather Creaton,2003 A unique snapshot of London life as recorded by diarists whose interests range from high politics to housework childbirth to deathbeds burglaries to bowel movements In a city of London s complexity and size it can be difficult to pinpoint the experience of the individual at a specific period Diaries however represent a valuable approach into this elusive world Diarists may concentrate on great events or on the comparative trivia of their everyday round but they all convey some genuine flavour of London life that is hard to find in other sources The Sex Pistols - 1977: The Bollocks Diaries the Sex Pistols,2017-10-26 short sharp to the point minimal Never Mind the Bollocks is a blackmail note and we got you all to pay up JOHN LYDON When we first went in Wessex recording studios we went in through this side door Freddie Mercury was there doing a vocal take and we walked right through with our guitars He threw a wobbler STEVE JONES God Save The Queen was definitely the pinnacle It all went sour after that PAUL COOK Malcolm was a shit stirrer I think he s got a short attention span He played this game of pitching me against John Now we realise there was a lot of false information going between us GLEN MATLOCK On the 40th anniversary of the release of Never Mind the Bollocks Here s the Sex Pistols The Sex Pistols 1977 The Bollocks Diaries is the official inside story of the whirlwind year of 1977 the recording and release of Never Mind the Bollocks and the year the Sex Pistols changed everything From God Save the Queen to Holidays in the Sun and everything in between it was a year of chaos and creation Straight from the mouths of the Sex Pistols and their collaborators with first hand stories of secret gigs recording sessions fights record label meltdowns and a media
