Junior Graphic Mavis Kitcher (Mrs),2011-01-26 *Doubtful Minds, Arise!!* Mawuli Dzitse,2020-05-25 Have you paused for a second to consider the power behind the great innovations we see around us these days the internet computers aeroplanes cell phone technology drone photography multimedia stuff LED ads etc What do all these inventions have in common Well these are all products of the human mind The creator of the universe endowed humans with an exceptional gift which when well harnessed enables us to think and solve problems How well we use this gift of the mind is the subject matter of this book written by Mawuli Dzitse In relatively few pages the author establishes the important role the mind plays in our lives Any manipulation of the mind has a telling effect on who we are and what we become The mind is like an independent variable the state of the dependent variable revolves around it So what happens when the mind is in a doubtful state A doubtful mind does not necessarily have to result in negative developments In fact doubt generates creativity When used in moderation doubt can be a welcoming asset in the society It is a mover for social change Nevertheless doubt can be pathological if it is not managed properly It is the prevention of negative aspects of doubt that the author focuses in this book The underlying tone of the book posits that every human being has the capacity to use their mind to produce outcomes that can improve the quality of life than the one they came to meet Mawuli provides answers to questions aimed at enhancing individual outlook on life as well as strategies for making the mind clean healthy and functional In other words how individuals should nurse and nurture their mind food which he identifies as information and messages He advises readers to avoid activities that can kill dreams The book is spiced with biblical quotations to lubricate the mind and provide spiritual wisdom to the reader In addition the author provides practical exercises in Self Post reading Discernment sections that allow the reader to have hands on training and the feel of what is being advocated It s a must read for all who aspire to greatness and those who want to optimize the use of their greatest gift the mind Doubtful Minds Arise will be useful to students teachers the young and the old men women and all those who want to experience an intrinsically fulfilling life Dr Ransford Antwi Department of Communication Studies Central University Ghana **The Mirror** Margaret Safo (Mrs.),2005-12-03

Junior Graphic Victoria Odoi,2014-01-29 *SECURING TOMORROW TODAY: A Path Towards Quality Education* Raymond A. Mensah,2021-11-15 Almost everything in the country points to the need for a reorientation towards education as the status quo portends a serious disaster There are many dimensions to this challenge but this book tackles the student aspect since it can singularly turn the whole situation around if well addressed It therefore offers a call to duty by providing a guide to the path of quality scholarship It aims at providing an exposure to the fundamentals of quality education that will prepare students for a transformative and a life long learning culture to lay a solid base for both individual and national development Witches of Honour Adei, Asare,2016-05-13 It was said that Danoa didn t have any luck to go with her beauty Her birth brought nothing but hardship upon her mother and the woman s entire family Then just when by a twist of fate

things started looking up for her she got labelled a witch How Danao coped with the odds against her forms the plot of Asare Adei s new page turner The book was awarded third place in the Burt Book award for Ghana in 2015 **Children, Childhood, and the Future** Andrea Kleeberg-Niepage,2020-01-10 Although most of the world s children live in the Global South much of the corpus of scientific knowledge which forms the basis of the current notion of good childhood worldwide is drawn from research on Western middle class children Even cross cultural research often applies the Western model of childhood as the standard to which others must correspond This volume serves to bridge this gap by both bringing up significant features of the development and socialisation of children in African countries and presenting cross cultural procedures which help to discuss and develop differentiated and joint ideas about childhood instead of implementing one sided standards which are disconnected from most children s lives *Learning Asante Twi without tears: without special title* Emmanuel Osei-Bonsu,2002 **Daily Graphic** Ransford Tetteh,2011-02-25 **Daily Graphic** Elvis D.

The Eleven-Plus Book Michael O'Mara Books,2016-10-27 Is the nation really dumbing down Are exams really easier than they were in the good old days Now s the chance to find out with this nostalgic collection of questions from exam papers of the 1940s and 50s **The Student's Guide to Passing Exams** Richard Burns,2014-05-12 In a lively style this text shows how anyone can improve their chances of exam success by following a few simple rules It contains tips for exam preparation and for improving performance in the exam itself **Education Questions and Answers** Technical Extension Service, Inc., New York,1960 **Influences of External Assessment on Teaching and Learning in Junior High School in Ghana** Akunu Agbeti,2012 Assessment is integral to teaching and learning and external assessment is a logical sequel to the interaction between teachers and their students because it represents an account of this interaction to the public External assessments especially those that have high stakes such as the end of cycle examinations are known to have an influence on teaching and learning in the years that precede them The effect of external assessments on teaching and learning has been extensively researched The test items which transmit the influence have also been thoroughly analysed in terms of the kind of thinking that they demand from students However the aspect of external assessment that has not received much attention is the test developers who originate the test items and are therefore ultimately responsible for the type of effect the items have on teaching and learning External assessment in sub Saharan African countries especially demand mainly recall of facts with very little demand on the thinking and problem solving abilities of students This type of question tends to induce teaching and learning mainly for recall This research aims to throw light on the intentions of test developers for Basic Education Certificate Examination BECE in Ghana when they write items for this end of cycle examination A broadly qualitative approach was adopted for this research but quantitative data was used in addition Seven test developers were interviewed extensively on how they perform their test development activities In order to have a fuller understanding of the

external examination the teachers and students who experience its influence were included in the study Forty teachers and 120 students completed questionnaires relating to their beliefs about the BECE and eight each of the participating teachers and students were subsequently interviewed The findings suggest that the test developers were aware that the level of thinking in their questions was low and would prefer questions that demand higher levels of thinking They were also aware that past questions influence teaching and learning and were of the opinion that the standard of education is low However the test developers did not have the intention to change teaching and learning with their tests because they could not see a relation between their test items and the quality of teaching and learning It was also found that their personal interpretations and concerns about the social impact of the examination are more influential in determining the type of items they write This is significant because item writing is presumed to be a neutral and objective activity devoid of subjective considerations The findings further suggest that the examination influences what teachers teach and how they teach it and the teachers self worth prestige and public esteem depend on the performance of their students in the examination The students believed the BECE prevents them from learning other things and from developing their talents and they saw the examination as the fairest means of competing for selection to senior high school because it is less partial when compared with their teachers continuous assessment marks It was also found that past questions serve as an alternative curriculum because they determine the standard of the examination questions and also influence teaching and learning Through the medium of past questions the examination is able to influence policy by circumventing it or diverting attention away from it It was concluded that the influence of social considerations in item writing has created a vicious cycle of low level questions that induce teaching and learning aimed at recall which does not equip students to use knowledge acquired to solve the problems that attract the sympathy of the item writers It will require awareness creation among stakeholders about the central role of the external assessment in determining the quality of teaching and learning to break the cycle by improving the quality of the test items
