painting he was able to pronounce the words which served as a password to all later artists worthy of the name painting is a spiritual thing *cosa mentale* He completed Florentine draughtsmanship in applying to modelling by light and shade a sharp subtlety which his predecessors had used only to give greater precision to their contours This marvellous draughtsmanship this modelling and *chiaroscuro* he used not solely to paint the exterior appearance of the body but as no one before him had done to cast over it a reflection of the mystery of the inner life In the *Mona Lisa* and his other masterpieces he even used landscape not merely as a more or less picturesque decoration but as a sort of echo of that interior life and an element of a perfect harmony Relying on the still quite novel laws of perspective this doctor of scholastic wisdom who was at the same time an initiator of modern thought substituted for the discursive manner of the Primitives the principle of concentration which is the basis of classical art The picture is no longer presented to us as an almost fortuitous aggregate of details and episodes It is an organism in which all the elements lines and colours shadows and lights compose a subtle tracery converging on a spiritual a sensuous centre It was not with the external significance of objects but with their inward and spiritual significance that Leonardo was occupied **Lumley's Bibliographical Advertiser** ,1840 *Resources in Education* ,1999
