Siobhan Carroll, 2015-01-19 Planetary spaces such as the poles the oceans the atmosphere and subterranean regions captured the British imperial imagination Intangible inhospitable or inaccessible these blank spaces what Siobhan Carroll calls atopias existed beyond the boundaries of known and inhabited places The eighteenth century conceived of these geographic outliers as the natural limits of imperial expansion but scientific and naval advances in the nineteenth century created new possibilities to know and control them This development preoccupied British authors who were accustomed to seeing atopic regions as otherworldly marvels in fantastical tales Spaces that an empire could not colonize were spaces that literature might claim as literary representations of atopias came to reflect their authors attitudes toward the growth of the British Empire as well as the part they saw literature playing in that expansion Siobhan Carroll interrogates the role these blank spaces played in the construction of British identity during an era of unsettling global circulations Examining the poetry of Samuel T Coleridge and George Gordon Byron and the prose of Sophia Lee Mary Shelley and Charles Dickens as well as newspaper accounts and voyage narratives she traces the ways Romantic and Victorian writers reconceptualized

atopias as threatening or at times vulnerable These textual explorations of the earth's highest reaches and secret depths shed light on persistent facets of the British global and environmental imagination that linger in the twenty first century

Different Blood: The Vampire as Alien Margaret L. Carter, 2019-03-25 Different blood flows in their veins but our blood quenches their thirst

From Bram Stoker's 1897 creation of Count Dracula portrayed as a foreign invader bent on the conquest of England the literary vampire has symbolized the Other whether his or her otherness arises from racial ethnic sexual or species difference Even before the bloodsucking Martians of H G Wells War of the Worlds however popular fiction contained a few vampires who were members of alien species rather than supernatural undead Even more intriguing than interplanetary invaders are humanoid and quasi humanoid beings who have evolved to live on Earth among us often camouflaged as our own kind The boom in vampire fiction that began in the 1970s engendered a variety of alien vampires many of them portrayed as sympathetic characters The science fiction vampire is especially suited to the presentation of vampirism as morally neutral rather than inherently evil Different Blood surveys the literary vampire as alien whether extra terrestrial or a different species evolved on Earth from the mid 1800s to the 1990s and analyzes the many uses to which science fiction and fantasy authors have put this theme Their works explore issues of species race ecological responsibility gender eroticism xenophobia parasitism symbiosis intimacy and the bridging of differences An extensive bibliography lists dozens of novels and short stories on the vampire as alien theme many of which are still in print

The Gospel according to Science Fiction Gabriel McKee, 2007-01-02 In this thorough and engaging book Gabriel McKee explores the inherent theological nature of science fiction using illustrations from television shows literature and films Science fiction he believes helps us understand not only who we are but who we will become McKee organizes his chapters around theological themes using illustrations from authors such as Isaac Asimov and H G Wells television shows such as Star Trek and The Twilight Zone and films such as The Matrix and Star Wars With its extensive bibliography and index this is a book that all serious science fiction fans not just those with a theological interest will appreciate
