Great Big Elephants

By Rosa Muller

Read the passage below.

Almost everything about elephants is big. They are the largest animals that live on land. There are two kinds of elephants: the Indian elephant and the African elephants. A male, African elephant can weigh up to six thousand kilos. Elephants can be up to four meters tall. Elephants need to live in very large areas because they eat and drink so much. Every day, elephants spend about 16 hours eating. They eat up to 200 kilos of food. They can drink over 250 liters of water. Elephants have very big, very thin ears. Elephants use their ears to cool themselves down. An elephant's trunk can smell food, water and predators. Elephants need very strong legs to support their heavy bodies.
