Intelligent Systems in Production Engineering and Maintenance III Anna Burduk, Andre D. L. Batako, José Machado, Ryszard Wyczółkowski, Ewa Dostatni, Izabela Rojek, 2023-09-26 This book reports on intelligent methods and solutions in engineering production and maintenance It describes advanced tools for optimizing production processes increasing their automation safety and sustainability Contributions cover different stages of the production process such as product design supply chain and equipment maintenance and safety This is one of the two volumes based on the 4th International Conference on Intelligent Systems in Production Engineering and Maintenance ISPEM 2023 held on September 13 15 2023 in Wroclaw Poland

Robot Manipulators Marco Ceccarelli, 2008-09-01 In this book we have grouped contributions in 28 chapters from several authors all around the world on the several aspects and challenges of research and applications of robots with the aim to show the recent advances and problems that still need to be considered for future improvements of robot success in worldwide frames Each chapter addresses a specific area of modeling design and application of robots but with an eye to give an integrated view of what make a robot a unique modern system for many different uses and future potential applications Main attention has been focused on design issues as thought challenging for improving capabilities and further possibilities of robots for new and old applications as seen from today technologies and research programs Thus great attention has been addressed to control aspects that are strongly evolving also as function of the improvements in robot modeling sensors servo power systems and informatics But even other aspects are considered as of fundamental challenge both in design and use of robots with improved performance and capabilities like for example kinematic design dynamics vision integration
