A Practical Study of Argument Trudy Govier, 2013-01-01 Now available with CourseMate so students can complete the exercises online Trudy Govier's *A PRACTICAL STUDY OF ARGUMENT 7E International Edition* gives students an accessible and yet rigorous introduction to sound argumentation Presenting just enough theory to explain why certain kinds of arguments are sound or not then bringing this theory to life through everyday illustrations and examples the text provides students with a comprehensive introduction to critical thinking along with a synthesis of formal and informal approaches to logic **Practical Study of Argument Enhanced Edition** Govier, 2013 *A practical study of argument, 7th ed.*

enhanced Trudy Govier, 2014 *Argument Dialectics: The Place of Reasons in Logic* Hubert Marraud, 2025-06-12 This book is a systematic exposition of Argument Dialectics AD Despite its name argument dialectics is a logical approach to argumentation theory AD stands out among theories of argument because of three unusual features it is reasons based holistic and particularistic This implies that AD conceives of logic as a theory of the dialectical construction of reasons not as a theory of inferences Consequently contrary to other logical approaches AD focuses on the study of inter argumentative relations especially those of opposition and weighing The book makes an extensive use of the theory of reasons a branch of metaethics that has been a very valuable quarry of intuitions and concepts for the elaboration of a reason based theory of argument The oppositions generalism particularism and atomism holism proposed by Jonathan Dancy which play a central role in the book and in the development of AD have been adapted from the theory of reasons and the same can be said of the distinction between different statuses of reasons that AD associates with different kinds of counterarguments Conceiving of the theory of argument in terms of reasons has the effect of situating the paradigm of argumentation in practical argumentation reasoning about what to do rather than in theoretical argumentation about what to believe as inference based theories do Hence this book is of interest to argumentation theorists communication theorists epistemologists linguists moral philosophers and philosophers of law **Problems in Argument Analysis and Evaluation** Trudy Govier, 2018-06-22 We

are pleased to publish this WSIA edition of Trudy's Govier's seminal volume *Problems in Argument Analysis and Evaluation* Originally published in 1987 by Foris Publications this was a pioneering work that played a major role in establishing argumentation theory as a discipline Today it is as relevant to the field as when it first appeared with discussions of questions and issues that remain central to the study of argument It has defined the main approaches to many of those issues and guided the ways in which we might respond to them From this foundation it sets the stage for further investigations and emerging research This is a second edition of the book that is corrected and updated by the author with new prefaces to each chapter *Proof, Evidence and Hate Crime* Tshepo Bogosi Mosaka, 2025-07-18 Proof is the property of a disputed fact being established inferentially from an extant fact This book explicates the structural components of this phenomenon in the context of hate crimes across various jurisdictions around the world It departs from the orthodox conception of evidence and

proof as being a general value neutral or non normative and epistemic subject and offers a relativistic conception of this area of law The core argument is that proof is both semantically and methodologically determined by three conditions of materiality process and probativity This argument is then justified by the context specific application of this relativistic theory of proof to hate crimes This theoretical application of proof is sustained throughout the book using multiple examples and illustrations of hate crimes around the world The discussion both at the level of proof and hate crimes while focusing on the grounds of race religion and ethnicity specifically is framed in jurisprudential cross jurisdictional and interdisciplinary terms The book will be of interest to academics and researchers working in the areas of criminal law legal philosophy and procedural law

Argument Types and Fallacies in Legal Argumentation Thomas Bustamante,Christian Dahlman,2015-04-07 This book provides theoretical tools for evaluating the soundness of arguments in the context of legal argumentation It deals with a number of general argument types and their particular use in legal argumentation It provides detailed analyses of argument from authority argument ad hominem argument from ignorance slippery slope argument and other general argument types Each of these argument types can be used to construct arguments that are sound as well as arguments that are unsound To evaluate an argument correctly one must be able to distinguish the sound instances of a certain argument type from its unsound instances This book promotes the development of theoretical tools for this task

Rigour and Reason: Essays in Honour of Hans Vilhelm Hansen J. Anthony Blair ,Christopher W. Tindale,2020-06-11 Built in the centre of Copenhagen and noted for its equestrian stairway the Rundetaarn Round Tower was intended as an astronomical observatory Part of a complex of buildings that once included a university library it affords expansive views of the city in every direction towering above what surrounds it The metaphor of the towering figure who sees what others might not whose vantage point allows him to visualize how things fit together and who has an earned stature of respect and authority fits another Danish stalwart Hans Vilhelm Hansen whose contributions to the fields of informal logic and argument theory have earned the gratitude of his colleagues and inspired this collection of essays written to express the appreciation of its authors and of the many many colleagues they represent

On Reasoning and Argument David Hitchcock,2017-04-06 This book brings together in one place David Hitchcock s most significant published articles on reasoning and argument In seven new chapters he updates his thinking in the light of subsequent scholarship Collectively the papers articulate a distinctive position in the philosophy of argumentation Among other things the author develops an account of material consequence that permits evaluation of inferences without problematic postulation of unstated premises updates his recursive definition of argument that accommodates chaining and embedding of arguments and allows any type of illocutionary act to be a conclusion advances a general theory of relevance provides comprehensive frameworks for evaluating inferences in reasoning by analogy means end reasoning and appeals to considerations or criteria argues that none of the forms of arguing ad hominem is a fallacy describes proven methods of teaching critical thinking effectively

How Philosophers Argue Fernando Leal, Hubert Marraud, 2022-02-21 This volume presents a double argumentative analysis of the debate between Bertrand Russell and Frederick Copleston on the existence of God. It includes an introduction justifying the choice of text and describing the historical and philosophical background of the debate. It also provides a transcript of the debate based in part on the original recording. The argumentative analyses occupy Parts I and II of the book. In Part I the argumentative process is analysed by means of the ideal model of critical discussion, the workhorse of pragma-dialectics. Part I shows how the two parties go through the four stages of a critical discussion. It highlights the questions raised over and beyond the presiding question of whether God exists and examines almost a hundred questions that are raised. Many are left in the air, whereas a few others give rise to sundry sub-discussions or meta-dialogues. In Part II the theoretical framework of argument-dialectic is put to work: argument structures are identified by means of punctuation marks, argumentative connectors and operators, allowing to see the argumentative exchange as the collaborative construction of a macro-argument. Such a macro-argument is both a joint product of the arguers and a complex structure representing the dialectical relationships between the individual arguments combined in it. Finally, the complementarity of the two approaches is addressed. Thus, the book can be described as an exercise in adversarial collaboration.

Keeping in Touch With Pragma-Dialectics Eveline T. Feteris, Bart Garssen, A. Francisca Snoeck Henkemans, 2011-01-01 Keeping in touch with Pragma-Dialectics is written to honor Frans van Eemeren and his work in the field of argumentation theory on the occasion of his retirement. The volume contains 17 contributions from teams of authors consisting of a combination of a pragma-dialectician and one or two researchers with a different background in the field of argumentation. In this volume comparisons between the pragma-dialectical approach and other approaches are made; aspects of strategic maneuvering such as the use of presentational techniques, adaptation to the audience and the selection of topics are dealt with; and the influence of specific institutional contexts such as politics, medicine and internet forums on strategic maneuvering are discussed.

Argumentation Lapakko Ph. D., David Lapakko Ph. D., David Lapakko, 2009-10 *Argumentation: Critical Thinking in Action* 2nd ed explores a wide variety of issues and concepts connected to making arguments, responding to the arguments of others and using good critical thinking skills to analyze persuasive communication. Key topics include the nature of claims, evidence and reasoning, common fallacies in reasoning, traits associated with good critical thinking, how language is used strategically in argument, ways to organize an argumentative case, how to refute an opposing argument or case, cultural dimensions of argument and ways to make a better impression, either orally or in writing.

Reasonable Responses Catherine E. Hundleby, 2017-01-17 This tribute to the breadth and influence of Trudy Govier's philosophical work begins with her early scholarship in argumentation theory, paying special attention to its pedagogical expression. Most people first encounter Trudy Govier's work and many people only encounter it through her textbooks.

especially *A Practical Study of Argument* published in many editions In addition to the work on argumentation that has continued throughout her career much of Govier's later work addresses social philosophy and the problems of trust and response to moral wrongs The introduction by Catherine Hundleby situates Govier's research along the path of her unusual academic life While following the timeline of Govier's research publication in this collection the authors build on her work and suggest certain new connections between her argumentation theory and social philosophy *A Practical Study of Argument* first published in 1985 situates Govier among a distinct segment of informal logicians whose concerns about teaching reasoning to post secondary students orient their research Takuzo Konishi argues Moira Kloster evaluates Govier's progress in the challenge of providing critical thinking education to diverse and changing social contexts Shifting gears to social philosophy but still addressing education Laura Elizabeth Pinto explores the significance of Govier's work on trust for explaining the problem of audit culture for teaching At the centre of this volume social philosophy receives an abstract meta ethical defense from Linda Radzik Moving solidly into the domain of normative social philosophy Alice MacLachlan reconsiders Govier's condemnation of revenge by viewing it as a form of moral address but she notes how revenge as an act of communication contrasts with argumentation in lacking the respect that Govier maintains is intrinsic to argumentation MacLachlan ultimately agrees that revenge is morally indefensible The practical challenges of addressing others in the aftermath of wrongdoing especially in public contexts can make it difficult to distinguish between victims and combatants or wrongdoers Alistair Little and Wilhelm Verwoerd explain and Kathryn Norlock argues that forgiveness is psychologically vexed too People may recognize transformation to be in principle possible for all people Norlock argues and yet we may find the evidence regarding some particular evildoer sufficient to count that person as an exception Finally Govier responds to the various papers
