Atlas Of Genodermatoses Second Edition:

Atlas of Genodermatoses Gianluca Tadini, Michela Brena, Francesca Besagni, Lidia Pezzani, 2024-05-28 Genodermatoses are often considered rare diseases seldom seen by practicing clinicians but as a result professionals often have little experience or confidence with their diagnosis when they are called upon for a clinical case This text presents a comprehensive illustrated overview of almost 200 inherited diseases of the skin hair and nails Examples have been expanded with new images added to provide clear examples alongside coherent and comprehensive explanations to enable clinicians to easily identify and source relevant information This resource encompasses a varied range of skin diseases providing accessible and in depth information to help familiarise clinicians The entry for each disease provides background followed by common characterisations manifestations laboratory findings genetics cutaneous and extracutaneous findings differential diagnosis an overview of complications and recommended follow ups Authored by dermatologists and geneticists this is an atlas of scientific research which updates established information with current studies and references In its third edition this text becomes an invaluable resource for dermatologists and pediatricians

Atlas of Genodermatoses Ruggero Caputo, Gianluca Tadini, 2005-12-12 A lavishly illustrated guide to almost 200 inherited diseases of the skin hair and nails Each entry includes synonyms age of onset clinical findings complications course laboratory findings diagnosis therapy and key references adding up to far more than just a collection of photographs In addition to being a clinical primer this is also a work of scientific research and contains the first printed description of two new syndromes The fast moving world of genetic research means that the latest genetic correlations included here render previous texts out of date All specialists in Dermatology and Pediatrics should find this an invaluable front line resource in the clinic

Schachner and Hansen's Textbook of Pediatric Dermatology Antonio Torrelo, 2022-03-30 This two volume set is a complete guide to the diagnosis and treatment of paediatric skin conditions With its first edition having published more than 33 years ago this reference is renowned amongst clinicians practising in the field of paediatric dermatology The fifth edition has been thoroughly revised and updated to provide all the latest techniques and therapeutic advances for daily practice More than 2000 clinical and histologic pictures the majority new to this edition illustrate all the skin conditions described in the comprehensive text covering 2500 pages across the two volumes Detailed references offer suggestions for further reading Divided into 22 sections the book begins with an introduction to basic science and discussion on diagnosis in paediatric dermatology The following chapters cover a multitude of conditions from genetic diseases eczema and pigmentary disorders to vascular anomalies tumours and cysts skin infections and many more The book concludes with a section on the principles of treatment A complete section is dedicated to neonatal disorders The book is edited by Madrid based Antonio Torrelo with contributions from numerous other experts in the field The previous edition 9780723435402 published in 2010

Multidisciplinary Approach to Neurofibromatosis Type 1 Gianluca Tadini, Eric Legius, Hilde Brems, 2020-06-02 This volume offers an update

of the clinical signs diagnostic criteria including molecular diagnosis and targeted therapies for a particular type of genodermatosis providing a handy and unique tool for early diagnosis In recent years our understanding of genodermatosis and neurocutaneous syndromes has increased but although Type 1 Neurofibromatosis NF1 is the most common neuroectodermal disorder and involves a large number of patients and medical disciplines this syndrome remains underestimated often misdiagnosed thus leading to inaccurate treatment The literature on the molecular and pathogenetic aspects is ample but current clinical approaches classification diagnostic criteria and treatment protocols are outdated creating difficulties in early diagnosis and treatment As such a chapter is devoted renewing current diagnostic criteria it includes clinical and molecular data to offer a sound updated discussion basis for a consensus conference NF1 is a time dependent disorder meaning that the onset of clinical signs are closely linked to patient age and the book discusses this particularly neglected aspect extensively as well as the latest molecular diagnosis techniques which are highly sensitive have not been included in the diagnostic criteria It also explains the role of the RAS MAPK pathway and genotype phenotype correlations In addition it explores new concepts concerning the pathogenesis of neurofibromas and other hamarthomas and their relevance for a modern therapeutical approach with targeted molecular drugs as well as newly discovered aspects of NF1 in all internal organs together with their diagnostic counterparts A chapter on mosaic neurofibromatosis is also included There is a particular focus on differential diagnosis i e other diseases with café au lait macules and the recently described Legius syndrome will be presented directly by Prof Eric Legius All chapters are easy to understand up to date comprehensive and concise tools and are intended for a wide range of professionals involved with genetic disorders of the skin and neurocutaneous diseases dermatologists pediatricians neurologists oncologists and general practitioners **Dermatology**
