## **Bear Reaktion Books Animal:**

*Bear* Robert E. Bieder, 2005-08-18 A fascinating exploration of the evolutionary history of the bear family Bear also surveys the wealth of imagery myths and stories that surround this much loved animal **Bears** Bernd Brunner, 2007-01-01 A delightfully illustrated history of the complex relations between people and bears around the world **Affect, Space and Animals** Jopi Nyman, Nora Schuurman, 2015-11-19 In recent years animals have entered the focus of the social and cultural sciences resulting in the emergence of the new field of human animal studies This book investigates the relationships between humans and animals paying particular attention to the role of affect space and animal subjectivity in diverse human animal encounters Written by a team of international scholars contributions explore current debates concerning animal representation performativity and relationality in various texts and practices Part I explores how animals are framed as affective through four case studies that deal with climate change human bovine relationships and human horse interaction in different contemporary and historical contexts Part II expands on the issue of relationality and locates encounters within place mapping the different spaces where human animal encounters take place Part III then examines the construction of animal subjectivity and agency to emphasize the way in which animals are conscious and sentient beings capable of experiencing feelings emotions and intentions and active agents whose actions have meaning for the animals themselves This book highlights the importance of the ways in which affect enables animal agency and subjectivity to emerge in encounters between humans and animals in different contexts leading to different configurations It contributes not only to debates concerning the role of animals in society but also to the epistemological development of the field of human animal studies

*Animals in Detective Fiction* Ruth Hawthorn, John Miller, 2022-12-06 This book explores the vast array of animals that populate detective fiction If the genre begins as is widely supposed with Edgar Allan Poe's *Murders in the Rue Morgue* 1841 then detective fiction's very first culprit is an animal Animals moreover consistently appear as victims clues and companions while the abstract conception of animality is closely tied to the idea of criminality Although it is often described as an essentially conservative form detective fiction can unsettle the binary of human and animal to intersect with developing concerns in animal studies animal agency the ethical complexities of human animal interaction the politics and literary aesthetics of violence and animal metaphor Gathering its 14 essays into sections on ontologies ethics politics and forms *Animals in Detective Fiction* provides a compelling and nuanced analysis of the central role creatures play in this enduringly popular and continually morphing literary form *Animal Fiction in Late Twentieth-Century Canada* Alice Higgs, 2023-11-09 *Animal Fiction in Late Twentieth Century Canada* fulfils a vital contribution to the conversation surrounding animal representation as a point of continuity in national narratives and supports the idea that focusing on narratives of responsibility and care influences better relations with both non human animals and across settler Indigenous boundaries Alice Higgs engages with on going debates regarding reconciliation by demonstrating that it is imperative to critique settler

colonial environmental frameworks and place autonomy back into Indigenous communities by bringing Indigenous practices of custodianship and relationality to bear more generally This book also develops a number of conversations in animal studies in relation to the politics of representation Higgs studies a range of canonical Canadian authors demonstrating a progress across the period in which it is possible to identify the emergence of a literary pro animal turn      **Sacred, Symbolic, and Contested** Gregory S. Szarycz, 2025-09-04 Sacred Symbolic and Contested explores how animals are revered represented and disputed across global cultures Through vivid case studies from sacred cows in India to ritual slaughter in Judaism and animal commodification in industrial societies this book reveals how human animal relationships express deep ethical religious and political tensions You ll encounter surprising contradictions animals celebrated in myth yet mistreated in practice or protected in law yet consumed in daily life Drawing on sociology religious studies and critical animal studies this timely work invites you to rethink the role of animals in shaping human identity culture and moral responsibility      **Animals and Agency** Sarah McFarland, Ryan Hediger, 2009-06-02 While many scholars who write about animals deal with animal agency in some way this volume is the first to position the question of nonhuman agency as the primary focus of inquiry Section I presents studies of actual animals demonstrating agency Section II moves agency into new terrain while considering key representations of animal agency in literature Section III analyzes animals as mediators and as conveyances of human to human communication and Section IV investigates the agency of beings who defy conventional species categories The Envoi demonstrates how the microscopic polyp is interwoven into notions of agency and mythical superagency This volume s interdisciplinary explorations press hard on issues of agency to open up space for more questions about how we can understand relationships between the human and the nonhuman      *The Routledge Companion to the Environmental Humanities* Ursula Heise, Jon Christensen, Michelle Niemann, 2017-01-06 The Routledge Companion to the Environmental Humanities provides a comprehensive transnational and interdisciplinary map to the field offering a broad overview of its founding principles while providing insight into exciting new directions for future scholarship Articulating the significance of humanistic perspectives for our collective social engagement with ecological crises the volume explores the potential of the environmental humanities for organizing humanistic research opening up new forms of interdisciplinarity and shaping public debate and policies on environmental issues Sections cover The Anthropocene and the Domestication of Earth Posthumanism and Multispecies Communities Inequality and Environmental Justice Decline and Resilience Environmental Narratives History and Memory Environmental Arts Media and Technologies The State of the Environmental Humanities The first of its kind this companion covers essential issues and themes necessarily crossing disciplines within the humanities and with the social and natural sciences Exploring how the environmental humanities contribute to policy and action concerning some of the key intellectual social and environmental challenges of our times the chapters offer an ideal guide to this rapidly developing field      **Nature** Marie Addyman, 2021 A journey through texts on about or reflecting our experience of the

natural world      **What are the Animals to Us?** David Aftandilian, 2007 In What Are the Animals to Us scholars from a wide variety of academic disciplines explore the diverse meanings of animals in science religion folklore literature and art

*Developing Animals* Matthew Brower, 2011 How the emergence of wildlife photography changed the way we think about animals      Picturing Animals in Britain, 1750-1850 Diana Donald, 2007-01-01 From fine art paintings by such artists as Stubbs and Landseer to zoological illustrations and popular prints a vast array of animal images was created in Britain during the century from 1750 to 1850 This highly original book investigates the rich meanings of these visual representations as well as the ways in which animals were actually used and abused What Diana Donald discovers in this fascinating study is a deep and unresolved ambivalence that lies at the heart of human attitudes toward animals The author brings to light dichotomies in human thinking about animals throughout this key period awestruck with the beauty and spirit of wild animals people nevertheless desired to capture and tame them the belief that other species are inferior was firmly held yet at the same time animals in stories and fables were given human attributes though laws against animal cruelty were introduced the overworking of horses and the allure of sport hunting persisted Animals are central in cultural history Donald concludes and compelling questions about them then and now remain unanswered      *Animal Acts* Una Chaudhuri, Holly

Hughes, 2014-01-22 Encounters between the species in an anthology of lively solo performances and commentary      **Bears** Heather A. Lapham, Gregory A. Waselkov, 2020-01-20 Although scholars have long recognized the mythic status of bears in Indigenous North American societies of the past this is the first volume to synthesize the vast amount of archaeological and historical research on the topic Bears charts the special relationship between the American black bear and humans in eastern Native American cultures across thousands of years These essays draw on zooarchaeological ethnohistorical and ethnographic evidence from nearly 300 archaeological sites from Quebec to the Gulf of Mexico Contributors explore the ways bears have been treated as something akin to another kind of human in the words of anthropologist Irving Hallowell other than human persons in Algonquian Cherokee Iroquois Meskwaki Creek and many other Native cultures Case studies focus on bear imagery in Native art and artifacts the religious and economic significance of bears and bear products such as meat fat oil and pelts bears in Native worldviews kinship systems and cosmologies and the use of bears as commodities in transatlantic trade The case studies in Bears demonstrate that bears were not only a source of food but were also religious economic and political icons within Indigenous cultures This volume convincingly portrays the black bear as one of the most socially significant species in Native eastern North America Contributors Ralph Koziarski Megan C Kassabaum Louis Vincent Laperriere D sorcy J Lynn Funkhouser Heather A Lapham Hannah O Regan Christian St Pierre David Mather DR Tanya M Peres Claire St Germain Barnet Pavao Zuckerman Heather Altman Terrance Joseph Martin Thomas Berres J Matthew Compton Ashley Peles Gregory A Waselkov A volume in the Florida Museum of Natural History Ripley P Bullen Series

**Cultural Studies and Environment, Revisited** Phaedra. C Pezzullo, 2013-10-31 The environment is perhaps most misunderstood as a static place somewhere out there separated from the practices of our everyday lives Given this assumption environmental movements and concerns have remained mostly marginalized or denigrated in cultural studies publications conferences and presentations Recent global developments have made changing this oversight and at times direct resistance to engaging environmental concerns a new priority This edited collection illustrates an appreciation of the dynamic palpable and significant ways the environment permeates culture and vice versa as well as a collective commitment to the ways that cultural studies has more to offer and to learn from taking environmental matters to heart Like foundational categories of identity economics and historical context this collection reminds us why the environment is and should be considered relevant to any work done in the name of cultural studies Including research from four continents and across media the authors offer insights on timely topics such as food tourism human animal relations forests queer theory indigenous rights and water This book was published as a special issue of Cultural Studies

*Emerging Voices for Animals in Tourism* Jes Hooper, Carol Kline, 2024-02-14 While the study of animal human interactions within the context of tourism has been explored in a greater number and diversity of ways within the last decade the discourse remains divided between traditional tourism academia and outside disciplines looking in Tourism academia has borrowed philosophical ethical gender studies sociological ecological conservation and economic lenses to explore animals in tourism however collaboration with authors external to tourism studies remains few This edited volume strengthens the bridge between tourism academia and other disciplines by highlighting the fresh perspectives emerging methodologies and innovative interdisciplinary conventions at the forefront of animals in tourism research whilst critically working towards more ethical human animal interactions within the tourism and leisure space Split into four parts emerging motivations emerging cultures emerging narratives and emerging reflections this unique text will be widely applicable to scholars working towards equitable human animal interactions within tourism

**Animal Intimacies** Radhika Govindrajan, 2018-05-29 A delightful read and an important addition to human animal relations studies Anthropology Matters What does it mean to live and die in relation to other animals Animal Intimacies posits this central question alongside the intimate and intense moments of care kinship violence politics indifference and desire that occur between human and non human animals Built on extensive ethnographic fieldwork in the mountain villages of India s Central Himalayas Radhika Govindrajan s book explores the number of ways that human and animal interact to cultivate relationships as interconnected related beings Whether it is through the study of the affect and ethics of ritual animal sacrifice analysis of the right wing political project of cow protection or examination of villagers talk about bears who abduct women and have sex with them Govindrajan illustrates that multispecies relatedness relies on both difference and ineffable affinity between animals Animal Intimacies breaks substantial new ground in animal studies and Govindrajan s detailed portrait of the social political and religious life of the region will be of interest to cultural

anthropologists and scholars of South Asia as well Immerses us in passionate case studies on the multiple relationships between Kumaoni villagers and animals in Uttarakhand European Bulletin of Himalayan Research A memorable and innovative ethnography Piers Locke University of Canterbury Animal Labor and Colonial Warfare James L. Hevia, 2018-08-23 Until well into the twentieth century pack animals were the primary mode of transport for supplying armies in the field The British Indian Army was no exception In the late nineteenth century for example it forcibly pressed into service thousands of camels of the Indus River basin to move supplies into and out of contested areas a system that wreaked havoc on the delicately balanced multispecies environment of humans animals plants and microbes living in this region of Northwest India In Animal Labor and Colonial Warfare James Hevia examines the use of camels mules and donkeys in colonial campaigns of conquest and pacification starting with the Second Afghan War during which an astonishing 50 000 to 60 000 camels perished and ending in the early twentieth century Hevia explains how during the nineteenth and twentieth centuries a new set of human animal relations were created as European powers and the United States expanded their colonial possessions and attempted to put both local economies and ecologies in the service of resource extraction The results were devastating to animals and human communities alike disrupting centuries old ecological and economic relationships And those effects were lasting Hevia shows how a number of the key issues faced by the postcolonial nation state of Pakistan such as shortages of clean water for agriculture humans and animals and limited resources for dealing with infectious diseases can be directly traced to decisions made in the colonial past An innovative study of an underexplored historical moment Animal Labor and Colonial Warfare opens up the animal studies to non Western contexts and provides an empirically rich contribution to the emerging field of multispecies historical ecology
