## Chapter 8

### Inventory:

- Items held for sale in the ordinary business or goods to be used in the production of goods to be sold
- These accounts represent cost of goods that companies have on hand as of the measurement date
- The ending inventory from one period becomes the beginning balance of the next period

\*All inventory Costs are first recorded in the inventory account and as they get sold the cost gets taken out of inventory (balance sheet) and into cost of goods sold (income statement)

### Merchandisers:

- One inventory account
- purchase merchandise in a form ready for sale

### Manufacturers:

- three different accounts
  - o Raw materials
  - o Work in progress
  - o Finished Goods
- All get added together for a total inventory account

### Income Statement Presentation

**Sales Revenue – Cost of Goods Sold = Gross Profit – Operating Expenses = Net Income from Operations**

\*Cost of Goods sold is the total inventory sold during the period

\*Period Costs are costs that are directly connected with bringing the goods to the buyer's place of business or converting raw materials to goods in salable condition

### Flow of Costs (Merchandiser):

**Beginning Inventory + Cost of Goods Purchased = Cost of Goods Available for Sale – Cost of Goods Sold = Ending Inventory**

### Perpetual System (Merchandisers)

1. Purchases of merchandise are debited to Inventory
  2. Freight-In is debited to inventory
  3. purchase returns and allowances, as well as purchase discounts are credited to inventory
  4. Subsidiary records show quantity and cost of each type of inventory on hand
- This system provides continuous record of inventory and cost of goods sold—it is expensive to have

### Period System (Merchandisers)

1. Beginning of the period, inventory has a beginning balance
2. Purchases of merchandise are debited to a SEPARATE purchase account
  - a. Returns are sent to a SEPARATE returns account
3. When the period ends, ending inventory gets determined by a physical count
4. Cost of Goods Sold gets calculated with a formula

**\*Beginning inventory + Purchases = Cost of Goods Available for Sale – Ending Inventory = Cost of Goods Sold**

5. The merchandiser makes journal entries to record the calculated Cost of Goods sold into the income statement and reflect the ending inventory from the physical count in the inventory account
- Everything has its own account→ inventory, purchases, shipping, discounts and returns
