Task Scheduling for Multi-core and Parallel Architectures Quan Chen,Minyi Guo,2017-11-23 This book presents task scheduling techniques for emerging complex parallel architectures including heterogeneous multi core architectures warehouse scale datacenters and distributed big data processing systems The demand for high computational capacity has led to the growing popularity of multicore processors which have become the mainstream in both the research and real world settings Yet to date there is no book exploring the current task scheduling techniques for the emerging complex parallel architectures Addressing this gap the book discusses state of the art task scheduling techniques that are optimized for different architectures and which can be directly applied in real parallel systems Further the book provides an overview of the latest advances in task scheduling policies in parallel architectures and will help readers understand and overcome current and emerging issues in this field
