**The Law of Cryonics** Pierre de Gioia Carabellese, Camilla Della Giustina, 2024-03-19 This book through the lens of interdisciplinary legal analysis draws a subtle balance between bioethics and financial regulation with the latter playing an unexpectedly crucial role in the way life may potentially be governed The legal topic of human preservation or cryoconservation was initially developed in the United States in the case of *Donaldson v van de Kamp* More recently the subject arose in Europe as a result of a decision of the High Court Family Division London This new theme of cryoconservation has unfolded through multifaceted forms including its impact on regulation In an area that may at least prima facie be regarded as belonging to the traditional realm of medical law the findings presented here suggest that its potential has strong economic implications The work argues that it is necessary also to look at this subject from a more interdisciplinary perspective drawing a fil rouge between two otherwise seemingly opposing areas of law medical law and financial regulation The legal framework draws on the Anglo American and the United Kingdom in particular along with civil law analysis from Italy The work will be of interest to researchers and academics in the areas of medical law legal philosophy financial law property law and insurance law

Anatomical Forms Whitney Sperrazza, 2025-06-10 Demonstrates how early modern women writers such as Margaret Cavendish and Hester Pulter wielded poetics as a tool for scientific work Anatomical Forms excavates the shared material practices of women's poetic work and anatomical study in early modern England Asserting that poetry is a dimensional technology Whitney Sperrazza demonstrates how women writers wielded poetics as a tool for scientific work in order to explore and challenge rapid developments in anatomy and physiology In the sixteenth and seventeenth centuries anatomists were actively exploring the best ways to represent bodies in texts to translate the work of the dissection room into the pages of books When we recognize Renaissance anatomy as fundamentally a book making project Sperrazza insists we find a complex and expansive history of anatomy in the pages of women's poetry Women poets have long been absent from histories of literature and science but by shifting our focus from content to form Sperrazza reveals complex engagements with questions on corpse preservation dissection obstetrics and gynecology and skin theory in the poetry of Margaret Cavendish Aemilia Lanyer Mary Wroth Mary Sidney Herbert and Hester Pulter Through close formal analysis and original research on early modern anatomy treatises Anatomical Forms weaves together critical conversations in poetics book history the history of science and women's

writing Sperrazza challenges her readers to imagine science differently to understand that science might not always look like we expect it to look and in the process brings into focus a feminist history of poetic form centered on material practice

*The Alcalde*, 1990-01 As the magazine of the Texas Exes The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years The Alcalde serves as an intellectual crossroads where UT's luminaries artists engineers executives musicians attorneys journalists lawmakers and professors among them meet bimonthly to exchange ideas Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater The magazine's unique name is Spanish for mayor or chief magistrate the nickname of the governor who signed UT into existence was The Old Alcalde □□□□1, 2024-12-16 This horrible imagination has accompanied me through countless tossing and
