Manual of Accounting, International Financial Reporting Standards Greg F. Burton, Eva K. Jermakowicz, 2015-02-20. International Financial Reporting Standards: A Framework-based Perspective links broad concepts and general accounting principles to the specific requirements of IFRS to help students develop and understand the judgments required in using a principle-based standard. Although it is still unclear whether the US will adopt IFRS, the global business environment makes it necessary for accounting students and professionals to be bilingual in both US GAAP and IFRS. This comprehensive textbook offers a clear presentation of the concepts underlying IFRS, a conceptual framework to guide students in interpreting and applying IFRS rules, a comparison between IFRS and US GAAP to develop students' understanding of the requirements of each standard, real-world examples and case studies to link accounting theory to practice while also exposing students to different interpretations and applications of IFRS, end-of-chapter material covering other aspects of financial reporting including international auditing standards, international ethics standards, and corporate governance and enforcement, as well as emerging topics such as integrated accounting.
