Citizenship and Education in Contemporary China Yeow-Tong Chia,Zhenzhou Zhao,2023-05-31 A key objective of education in China is to cultivate one s moral values with the ultimate objective of becoming fully human Unlike the West which regards moral cultivation as related to but separate from citizenship cultivation East Asia including China views moral and citizenship cultivation as synonymous The essays in this book offer various perspectives on and

understandings of Chinese citizenship and education by a group of scholars of Chinese heritage situated inside and outside of China. They offer compelling evidence and rich theoretical discussions about the practice of teaching citizenship in the state education, the interplay between citizenship and China's cultural and religious traditions, and the construction of citizenship from the groups from marginal positions. The book uses citizenship as a lens to examine the pressing issues of identity, democracy, religion, and cosmopolitanism, and sheds new light on China's ongoing social and educational changes. Thinking through citizenship and citizenship education may act as an important driving force to transform the culture and paradigms of governance in China and the new meanings of becoming fully human. This book will be of interest to researchers and advanced students of Education, Politics, Sociology, and Public Policy. The chapters in this book were originally published in various Routledge journals.
