In and against Development Ben Fine, 2025-03-31 Long self proclaimed as Knowledge Bank the World Bank is as active as criticised in its endeavours across scholarship ideology and policy in practice serving US interests in the age of globalisation neoliberalism and financialisation This Volume focuses on the Bank s scholarship meticulously criticising it and assessing alternatives Its analytical framing draws upon economics imperialism in general and its evolution through three phases Corresponding phases of new newer and newest development economics are identified with the World Bank taking a leading role in each with implications for the expanding scope of development economics and its contestations with development studies

Rethinking Food Systems Nadia C.S. Lambek, Priscilla Claeys, Adrienna Wong, Lea Brilmayer, 2014-01-10 Taking as a starting point that hunger results from social exclusion and distributional inequities and that lasting sustainable and just solutions are to be found in changing the structures that underlie our food systems this book examines how law shapes global food systems and their ongoing transformations Using detailed case studies historical mapping and legal analysis the contributors show how various actors farmers civil society groups government officials international bodies use or could use different legal tools legislative jurisprudential norm setting on various scales local national regional global to achieve structural changes in food systems Section 1 Institutionalizing New Approaches explores the possibility of institutionalizing social change through two alternative visions for change the right to food and food sovereignty Individual chapters discuss V a Campesina s struggle to implement food sovereignty principles into international trade law and present case studies on adopting food sovereignty legislation in Nicaragua and right to food legislation in Uganda The chapters in Section 2 Regulating for Change explore the extent to which the regulation of actors can or cannot change incentives and produce transformative results in food systems They look at the role of the state in regulating its own

actions as well as the actions of third parties and analyze various means of regulating land grabs The final section Governing for Better Food Systems discusses the fragmentation of international law and the impacts of this fragmentation on the realization of human rights These chapters trace the underpinnings of the current global food system explore the challenges of competing regimes of intellectual property farmers rights and human rights and suggest new modes of governance for global and local food systems The stakes for building better food systems are high Our current path leaves many behind destroying the environment and entrenching inequality and systemic poverty While it is commonly understood that legal structures are at the heart of food systems the legal academy has yet to make a significant contribution to recent discussions on improving food systems this book aims to fill that gap **Governing the Nexus** Mathew Kurian,Reza

Ardakanian,2014-11-08 Global trends such as urbanization demographic and climate change that are currently underway pose serious challenges to sustainable development and integrated resources management The complex relations between demands resource availability and quality and financial and physical constraints can be addressed by knowledge based policies and reform of professional practice The nexus approach recognizes the urgent need for this knowledge and its interpretation in a policy relevant setting that is guided by the understanding that there is a lack of blueprints for development based on integrated management of water soil and waste resources in the Member States Generation and application of knowledge is both a priority for individual but also institutional capacity development *Challenges and*

Solutions of Climate Impact on Agriculture Shah Fahad,Muhammad Adnan,Iqbal Munir,Rattan Lal,Taufiq Nawaz,Shah Saud,2024-10-08 Challenges and Solutions of Climate Impact on Agriculture explores issues arising from the changing climate for agricultural plants with a soil focused approach Addressing the impacts on a range of important global food crops it looks at issues of water and temperature and their impact on soil quality for production Presented by a global team of experts this book will be important for researchers seeking to understand specific challenges and means of addressing those challenges effectively and efficiently The agriculture sector is arguably one of the most sensitive to changes in the climate Because the climate of a region determines the nature and characteristics of vegetation and crops any change in the mean seasonal temperature and decrease in effective precipitation can reduce productive periods for crops risking outbreaks of pests and disease and negatively affecting global food security Explains the impact of climate change on soil properties productivity and microbial diversity Provides detailed information regarding the impact of climate change on yields of cereal grains and other crops Enables agricultural scientists to design policies and management strategies for sustainable agriculture **Sustainable Food Production Includes Human and Environmental Health** W. Bruce Campbell,Silvia

López-Ortíz,2013-11-01 Agroecology not only encompasses aspects of ecology but the ecology of sustainable food production systems and related societal and cultural values To provide effective communication regarding status and advances in this field connections must be established with many disciplines such as sociology anthropology environmental sciences ethics

agriculture economics ecology rural development sustainability policy and education or integrations of these general themes so as to provide integrated points of view that will help lead to a sustainable construction of values Such designs are inherently complex and dynamic and go beyond the individual farm to include landscapes communities and biogeographic regions by emphasizing their unique agricultural and ecological values and their biological societal and cultural components and processes

Micro Perspectives for Decentralized Energy Supply Martina Schäfer, 2011

The GEO Handbook on Biodiversity Observation Networks Michele Walters, Robert J. Scholes, 2016-11-25 Biodiversity observation systems are almost everywhere inadequate to meet local national and international treaty obligations As a result of alarmingly rapid declines in biodiversity in the modern era there is a strong worldwide desire to upgrade our monitoring systems but little clarity on what is actually needed and how it can be assembled from the elements which are already present This book intends to provide practical guidance to broadly defined biodiversity observation networks at all scales but predominantly the national scale and higher This is a practical how to book with substantial policy relevance It will mostly be used by technical specialists with a responsibility for biodiversity monitoring to establish and refine their systems It is written at a technical level but one that is not discipline bound it should be intelligible to anyone in the broad field with a tertiary education

Indigenous Food Systems Priscilla Settee, Shailesh Shukla, 2020-01-31 Indigenous Food Systems addresses the disproportionate levels of food related health disparities among First Nations Métis and Inuit people in Canada seeking solutions to food insecurity and promoting well being for current and future generations of Indigenous people Through research and case studies Indigenous and non Indigenous food scholars and community practitioners explore salient features practices and contemporary challenges of Indigenous food systems across Canada Highlighting Indigenous communities voices the contributing authors document collaborative initiatives between Indigenous communities organizations and non Indigenous allies to counteract the colonial and ecologically destructive

monopolization of food systems This timely and engaging collection celebrates strategies to revitalize Indigenous food systems such as achieving cultural resurgence and food sovereignty sharing and mobilizing diverse knowledges and voices and reviewing and reformulating existing policies research and programs to improve the health well being and food security of Indigenous and Canadian populations Indigenous Food Systems is a critical resource for students in Indigenous studies public health anthropology and the social sciences as well as a vital reader for policymakers researchers and community practitioners

Reimagining Climate Change Paul Wapner,Hilal Elver,2016-02-05 Responding to climate change has become an industry Governments corporations activist groups and others now devote billions of dollars to mitigation and adaptation and their efforts represent one of the most significant policy measures ever dedicated to a global challenge Despite its laudatory intent the response industry or Climate Inc is failing Reimagining Climate Change questions established categories routines and practices that presently constitute accepted solutions to tackling climate change and offers alternative routes forward It does so by unleashing the political imagination The chapters grasp the larger arc of collective experience interpret its meaning for the choices we face and creatively visualize alternative trajectories that can help us cognitively and emotionally enter into alternative climate futures They probe the meaning and effectiveness of climate protection from below forms of community and practice that are emerging in various locales around the world and that hold promise for greater collective resonance They also question climate protection from above in the form of industrial and modernist orientations and examine large scale agribusinesses as well as criticize the concept of resilience as it is presently being promoted as a response to climate change This book will be of great interest to students and scholars of climate change global environmental politics and environmental studies in general as well as climate change activists

Ecological Intensification of Natural Resources for Sustainable Agriculture Manoj Kumar Jhariya,Ram Swaroop Meena,Arnab Banerjee,2021-03-07 Ecological intensification involves using natural resources such as land water soil nutrients and other biotic and abiotic variables in a sustainable way to achieve high performance and efficiency in agricultural yield with minimal damage to the agroecosystems With increasing food demand there is high pressure on agricultural systems The concept of ecological intensification presents the mechanisms of ensuring high agricultural productivity by restoration the soil health and landscape ecosystem services The approach involves the replacement of anthropogenic inputs with eco friendly and sustainable alternates Effective ecological intensification requires an understanding of ecosystems services ecosystem s components and flow of resources in the agroecosystems Also awareness of land use patterns socio economic factors and needs of the farmer community plays a crucial role It is therefore essential to understand the interaction of ecosystem constituents within the extensive agricultural landscape The editors critically examined the status of ecological stress in agroecosystems and address the issue of ecological intensification for natural resources management Drawing upon research and examples from around the world the book is offering an up to date account and insight into the approaches that can be

put in practice for poly cropping systems and landscape scale management to increase the stability of agricultural production systems to achieve Ecological resilience It further discusses the role of farmer communities and the importance of their awareness about the issues This book will be of interest to teachers researchers climate change scientists capacity builders and policymakers Also the book serves as additional reading material for undergraduate and graduate students of agriculture forestry ecology agronomy soil science and environmental sciences National and international agricultural scientists policymakers will also find this to be a useful read for green future

Imagining Sustainable Food Systems Alison Blay-Palmer,2016-05-13 What defines a sustainable food system How can it be more inclusive How do local and global scales interact and how does power flow within food systems How to encourage an interdisciplinary approach to realizing sustainable food systems And how to activate change These questions are considered by EU and North American academics and practitioners in this book Using a wide range of case studies it provides a critical overview showing how and where theory and practice can converge to produce more sustainable food systems
