## **2012 Crossing The Bridge To The Future:**

2012 Mark Borax, 2010-05-18 2012 Crossing the Bridge to the Future is an engaging personal narrative through the author's apprenticeship with master astrologer William Lonsdale who teaches him how to access a source of great power and creativity buried within the human soul. The book begins in August 1987 on the slopes of Mount Shasta in Northern California as Borax witnesses the Harmonic Convergence a spiritual and astrological event sparking a 26 year countdown to 2012 the year that marks the end of history in the Mayan calendar. Signs indicate that a major energy shift is occurring a turning point in Earth's collective karma powerful enough to change the global perspective of humankind. Borax's mountaintop experiences compel him to seek solutions to his personal turmoil. He meets Lonsdale and together they launch a mystery school to study how the twenty five year period between 1987 and 2012 can be used for a cosmic purging of negativity to release humanity's core forces and restore universal balance. En route Borax and his fellow students discover truths about life after death karma reincarnation past lives human evolution and the purpose of our existence on earth. In the tradition of The Teachings of Don Juan Carlos Castaneda's tales of his shamanic master 2012 Crossing the Bridge to the Future is a gripping sorcerer's apprentice story driven by mystical forces encouraging readers to expand their everyday awareness and challenge their fundamental beliefs about their place in the universe.

**Cosmic Weather Report** Mark Borax, Ellias Lonsdale, 2011-06-28 On a planet facing environmental and geopolitical catastrophes on every continent the idea that human beings need to evolve or die is gaining currency on an almost daily basis. Cosmic Weather Report tackles the personal and collective obstacles to world transformation head on inspiring readers to rethink the whole purpose of humankind and change their lives and the course of the planet's future from within. In this book eminent astrologers Mark Borax and Ellias Lonsdale pool their talents to explore what we are emerging from the age we need to leave behind and what we are approaching the age we're on the verge of creating. Readers are encouraged to see how the greatest difficulties can be seized for optimal growth. While Cosmic Weather Report is not an astrology book per se it uses astrological concepts which can also be read as metaphors to convey the universal scale of the transformations taking place. Preserving the lecture format and question and answer dialogue of Lonsdale and Borax's famed mystery school the authors usher readers into an exciting classroom of evolution in which students get to quiz the teachers.

Limitless Possibilities Kathleen Walsh, 2009-09-24 Each of us has felt the energy shift as the planet transitions into the fifth dimension. We have felt time speed up and felt energies that are at times so chaotic and unpredictable that we have been thrown off our usual course. Some of us have been rocked to our very core. We are asking ourselves what is this and why is this happening. We each have chosen to come to earth during this time of great transition. We are all here sharing our lives with each other helping Mother Earth move into the Golden Age the spiritual Age of Aquarius. This transition will complete on the date that the Mayan civilization predicted some 26 000 years ago December 21st 2012. There is much work to be done as we realize the need for the shift that must occur in our personal lives so that we

can be in sync with the new fifth dimensional energy on this planet As our world resets itself so too must we reset ourselves What this means to each of us is that it is time to understand the meaning of how to live more fully in the fifth dimension Each of us must identify where we currently stand and where we need to go in order to experience the wonderment of fifth dimensional living Why Many of us may be existing as a two or a three dimensional person The energies that sustain those dimensions no longer exist on this planet So the old ways of thinking or operating that produced success at one time no longer exist It is now necessary for us if we are to exist in harmony with our planet to transition as well If we choose not to transition then frustration and anger will become paramount in our lives The choice is up to us To live in the fifth dimension is not only to experience the energy of magic and miracles but to learn that we can create all the perfection we desire in our lives by simply shifting our thinking into fifth dimensional thinking We are able to see the perfection where formerly we saw the illusion of imperfection This new vantage point allows us to become the center of our own reality and easily navigate through difficult individuals and challenging events while maintaining a state of balance and harmony We are then able to turn possibilities into probabilities and probabilities into actualities This journey begins with describing and identifying all of the unseen but certainly not unfelt influences in our lives that have been given to each of us to help us live our life on earth in the best and easiest manner possible Each reader will be able to identify their birthright gift as well as the other gifts available to tap into and expand one's energy thereby allowing this innate knowledge to grow and develop All of the necessary techniques and tools are explained in detail in this book so that you can easily make the transition from your current dimension into the fifth dimension allowing you to create a new future You are able to learn and make friends with each of your bodies of consciousness and their respective inner child and together you begin a journey of healing You as parent of these inner children learn how to set the stage and the rules so that everyone is playing by the same playbook You learn that you may win as a team or you may lose as a team but you are all on the same team working together to achieve that balance that allows you to maintain your newly found center By removing fears one by one each of us can transition from a place of fear into a place of love learning to live from the heart As we work towards this goal we isolate and identify the negative emotions that have been growing and harvesting within These negative emotions equate disease This book is your guide to help acknowledge these fears recognize and release them one by one creating a new you a lighter you We then experience a new energy a more evolved energy a higher vibrating energy as we invite the energy of excellent health and balance into our bodies It is here that

**Interstate 29/35 Paseo Bridge Corridor, Clay and Jackson Counties**, 2006      **Crossing the Bridge of the Digital Divide** Anthony H. Normore, Antonia Issa Lahera, 2018-09-01

*Crossing the Bridge of the Digital Divide: A Walk with Global Leaders* explores the combined effect of the rapid growth of information as an increasingly fragmented information base, a large component of which is available only to people with money and/or acceptable institutional affiliations. In the recent past, the outcome of these challenges has been characterized as the digital divide between the information haves and have-nots along racial and socio-economic lines that seem to widen as time passes. To address the issues of digital equity and digital inequality in an effort to bridge the digital divide, educational scholars, researchers and practitioners are in positions to ensure equitable opportunities are made available for people of all ages, races, ability, sexual orientation and ethnicity in support of social justice for bridging the digital divide. The digital divide addresses issues concerning equal opportunity, equity and access that have an effect on the development of marginalized and otherwise disenfranchised populations within and across systems nationally and internationally. The contributing authors representing United States, Canada, South Africa, New Zealand and the UK posit that education institutions can serve as the bridge to close the digital divide for students who do not have access to information technology in their homes. At a time when more computers are made available in schools than ever before, the digital divide continues to widen and fewer people in the lowest SES groups are given the opportunity to join the world of computer technology and the internet. As a result, the influence of leadership activity on institutional racism, gender discrimination, inequality of opportunity, inequity of educational processes, digital exclusion and justice have gained currency and attention. The contributing national and international authors examine the digital divide in terms of social justice, leadership, equity and access. It is within this context that the authors offer discussions from a lens of their choice, i.e. conceptual review of literature, epistemological, etc. By adopting an educational approach to bridging the digital divide, researchers and practitioners can connect and extend long established lines of conceptual and empirical inquiry aimed at improving organizational practices and thereby gain insights that might be otherwise overlooked or assumed. This holds great promise for generating, refining and testing theories of leadership for

equity and access and helps strengthen already vibrant lines of inquiry on social justice      *Engineering Your Future* David Dowling, Roger Hadgraft, Anna Carew, Tim McCarthy, Doug Hargreaves, Caroline Baillie, Sally Male, 2020-01-21 Dowling s *Engineering Your Future An Australasian Guide Fourth Edition* is used for first year core subjects across all Engineering disciplines Building on the previous editions this text has been updated with new references while still maintaining a strong and practical emphasis on skills that are essential for problem solving and design Numerous topical and locally focused examples of projects across engineering disciplines help demonstrate the role and responsibilities of a professional engineer Themes of sustainability ethical practice and effective communication are a constant throughout the text This full coloured print with interactive e text resource has a variety of digital media embedded at the point of learning such as videos and knowledge check questions to engage students and to help consolidate their learning      *Engineering Challenges for Sustainable Future* Noor Amila Wan Abdullah Zawawi, 2016-12-01 *Engineering Challenges for Sustainable Future* contains the papers presented at the 3rd International Conference on Civil Offshore Environmental Engineering ICCOEE2016 Kuala Lumpur Malaysia 15 17 August 2016 under the banner of World Engineering Science Technology Congress ESTCON2016 The ICCOEE series of conferences started in Kuala Lumpur Malaysia 2012 and the second event of the series took place in Kuala Lumpur Malaysia 2014 This conference series deals with the civil offshore environmental engineering field addressing the following topics Environmental and Water Resources Engineering Coastal and Offshore Engineering Structures and Materials Construction and Project Management Highway Geotechnical and Transportation Engineering and Geo informatics This book is an essential reading for academic engineers and all professionals involved in the area of civil offshore and environmental engineering      **Huey P.
