Low Radar Cross Section HIS-Based Phased Array Hema Singh, Avinash Singh, 2020-08-16 The design and development of low radar cross section RCS phased array has been a challenging subject in stealth technology The frequency selective surface elements act as absorbers in specific frequency band and facilitate gain enhancement and reduction of antenna RCS This book presents a comprehensive EM design and analysis of such low profile patch arrays with high impedance surface based ground plane It explains how to determine radiation mode RCS of low profile antenna arrays with arbitrary configurations Detailed descriptions of design workflow of determining radiation and scattering behavior of antenna arrays have been supported with schematics tables and illustrations Aimed at engineers and researchers for RCS antenna engineers and graduate students in electrical engineering and electromagnetics it Discusses both radiation and scattering features of both planar and conformal HIS based low profile antennas Describes the theoretical background design simulations and analysis of low RCS phased array in detail Presents the physics behind the resultant radiation and scattering characteristics of designed antenna array

Helps readers understand design and analysis of low RCS antenna array without any degradation in its radiation performance Includes figures schematics and illustrations to provide comprehensive descriptions of both radiation and scattering characteristics of phased arrays of different configurations International Youth Conference on Electronics, Telecommunications and Information Technologies Elena Velichko,Maksim Vinnichenko,Victoria Kapralova,Yevgeni Koucheryavy,2020-11-27 This volume presents peer reviewed and selected papers of the International Youth Conference on Electronics Telecommunications and Information Technologies YETI 2020 held in Peter the Great St Petersburg Polytechnic University St Petersburg on July 10 11 2020 It discusses current trends and major advances in electronics telecommunications optical and information technologies focusing in particular on theoretical and practical aspects of developing novel devices and materials improving data processing methods and technologies The conference brings together young researchers and early career scientists participating in a series of lectures and presentations establishing contacts with potential partners sharing new project ideas and starting new collaborations Probe Suppression in Conformal Phased Array Hema Singh,Mausumi Dutta,P. S. Neethu,2016-08-23 This book considers a cylindrical phased array with microstrip patch antenna elements and half wavelength dipole antenna elements The effect of platform and mutual coupling effect is included in the analysis The non planar geometry is tackled by using Euler s transformation towards the calculation of array manifold Results are presented for both conducting and dielectric cylinder The optimal weights obtained are used to generate adapted pattern according to a given signal scenario It is shown that array along with adaptive algorithm is able to cater to an arbitrary signal environment even when the platform effect and mutual coupling is taken into account This book provides a step by step approach for analyzing the probe suppression in non planar geometry Its detailed illustrations and analysis will be a useful text for graduate and research students scientists and engineers working in the area of phased arrays low observables and stealth technology Radara Görünmezlik Teknolojisi Temel Bilgiler Hacı SOĞUKPINAR,2023-12-13 *Scientific and Technical Aerospace Reports* ,1992 *OAR Quarterly Index of Current Research Results* United States.
