Ags World History Chapter 26:

A Palace for a King Jonathan Brown, John Huxtable Elliott, 2003-01-01 The Buen Retiro a royal retreat and pleasure palace was built for Philip IV on the outskirts of Madrid in the 1630s With its superb display of paintings by Velázquez and other contemporary artists the palace became a showcase for the art and culture of Spain's Golden Age *A Palace for a King* first published in 1980 provides a pioneering total history of the construction decoration and uses of a major royal palace emphasising the relationship of art and politics at a critical moment in European history produced on different aspects of the history of the palace and its decoration since the 1970s A number of new unpublished illustrations have been added and many of the plates are now reproduced in colour The publication of this edition gains added importance from the fact that plans for the expansion of the Prado Museum include the restoration of the Hall of Realms to approximate its original appearance as reconstructed in this volume Anthropology's Global Histories Rainer F. Buschmann, 2008-10-31 Anthropologists and world historians make strange bedfellows Although the latter frequently employ anthropological methods in their descriptions of cross cultural exchanges the former have raised substantial reservations about global approaches to history Fearing loss of specificity anthropologists object to the effacing qualities of techniques employed by world historians this despite the fact that anthropology itself was a global comparative enterprise in the nineteenth century Rainer Buschmann here seeks to recover some of anthropology's global flavor by viewing its history in Oceania through the notion of the ethnographic frontier the furthestmost limits of the anthropologically known regions of the Pacific The colony of German New Guinea 1884-1914 presents an ideal example of just such a contact zone Colonial administrators there were drawn to approaches partially inspired by anthropology Anthropologists and museum officials exploited this interest by preparing large scale expeditions to German New Guinea Buschmann explores the resulting interactions between German colonial officials resident ethnographic collectors and indigenous peoples arguing that all were instrumental in the formation of anthropological theory He shows how changes in collecting aims and methods helped shift ethnographic study away from its focus on material artifacts to a broader consideration of indigenous culture He also shows how ethnological collecting often a competitive affair could become politicized and connect to national concerns Finally he places the German experience in the broader context of Euro American anthropology *Anthropology's Global Histories* will interest students and scholars of anthropology history world history and Pacific studies Civic Discipline Karen M. Morin, 2016-05-23 The American Geographical Society was the pre eminent geographical society in the nineteenth century U S This book explores how geographical knowledge and practices took shape as a civic enterprise under the leadership of Charles P. Daly AGS president for 35 years 1864-1899 The ideals and programmatic interests of the AGS link to broad institutional societal and spatial contexts that drove interest in geography itself in the post Civil War period and also link to Charles Daly's personal role as New York civic leader scholar revered New York judge and especially popularizer of geography Daly's leadership in a number

Knowledge Exchanges Between Portugal and Europe Nuno Luís Vila-Santa Braga Campos, 2025-10-01 Following recent historiographical appeals on the need to study knowledge exchanges between European maritime rivals and their impact on overseas expansionist processes this book makes this study for the Portuguese overseas empire between the fifteenth and seventeenth centuries As the first European maritime power to systematically launch long distance voyages Portugal became a model worth emulation when Spain France England and the Dutch Republic started their own overseas enterprises In different chapters that each adopt a case study relation Portugal Spain Portugal England Portugal France and Portugal Dutch Republic this book documents how Portuguese maritime knowledge was outsourced by its maritime rivals The impact that Portuguese nautical knowledge had is evaluated resorting particularly to a wide range of diplomatic and espionage documents Finally the book discusses the alleged Iberian secrecy policies regarding maritime knowledge explaining why there is no serious reason to consider their success **Creating Christian Granada** David

Coleman, 2013-08-15 Creating Christian Granada provides a richly detailed examination of a critical and transitional episode in Spain's march to global empire The city of Granada Islam's final bastion on the Iberian peninsula surrendered to the control of Spain's Catholic Monarchs Isabella and Ferdinand on January 2 1492 Over the following century Spanish state and Church officials along with tens of thousands of Christian immigrant settlers transformed the formerly Muslim city into a

Christian one With constant attention to situating the Granada case in the broader comparative contexts of the medieval reconquista tradition on the one hand and sixteenth century Spanish imperialism in the Americas on the other Coleman carefully charts the changes in the conquered city's social political religious and physical landscapes In the process he sheds light on the local factors contributing to the emergence of tensions between the conquerors and Granada's formerly Muslim native morisco community in the decades leading up to the crown mandated expulsion of most of the city's moriscos in 1569 1570 Despite the failure to assimilate the moriscos Granada's status as a frontier Christian community under construction fostered among much of the immigrant community innovative religious reform ideas and programs that shaped in direct ways a variety of church wide reform movements in the era of the ecumenical Council of Trent 1545 1563 Coleman concludes that the process by which reforms of largely Granadan origin contributed significantly to transformations in the Church as a whole forces a reconsideration of traditional top down conceptions of sixteenth century Catholic reform

Outgrowing the Earth Lester R. Brown, 2012 Historically food security was the responsibility of ministries of agriculture but today that has changed decisions made in ministries of energy may instead have the greatest effect on the food situation Recent research reporting that a one degree Celsius rise in temperature can reduce grain yields by 10 per cent means that energy policy is now directly affecting crop production Agriculture is a water intensive activity and while public attention has focused on oil depletion it is aquifer depletion that poses the more serious threat There are substitutes for oil but none for water and the link between our fossil fuel addiction climate change and food security is now clear While population growth has slowed over the past three decades we are still adding 76 million people per year In a world where the historical rise in land productivity has slowed by half since 1990 eradicating hunger may depend as much on family planners as on farmers The bottom line is that future food security depends not only on efforts

within agriculture but also on energy policies that stabilize climate a worldwide effort to raise water productivity the evolution of land efficient transport systems and population policies that seek a humane balance between population and food Outgrowing the Earth advances our thinking on food security issues that the world will be wrestling with for years to come

Secret Science María M. Portuondo, 2009-08-01 The discovery of the New World raised many questions for early modern scientists What did these lands contain Where did they lie in relation to Europe Who lived there and what were their inhabitants like Imperial expansion necessitated changes in the way scientific knowledge was gathered and Spanish cosmographers in particular were charged with turning their observations of the New World into a body of knowledge that could be used for governing the largest empire the world had ever known As Mar a M Portuondo here shows this cosmographic knowledge had considerable strategic defensive and monetary value that royal scientists were charged with safeguarding from foreign and internal enemies Cosmography was thus a secret science but despite the limited dissemination of this body of knowledge royal cosmographers applied alternative epistemologies and new methodologies that changed the discipline and in the process how Europeans understood the natural world

Sanctioned Savagery Michael Oriard, 2025-09-09 American football was a violent sport from its beginning as a college game in the 1870s and 1880s in part because learning how to deal with the pain and violence to take it made men out of college boys Michael Oriard former NFL linebacker and professor emeritus of English shows us that this fundamental belief persisted for more than a century until signs of chronic traumatic encephalopathy CTE were found in Pittsburgh Steelers center Mike Webster s brain Suddenly the cost of taking it could mean long term damage not just to the body but also to the brain Without anyone knowing it that risk had soared since the 1950s and 1960s when the hardshell plastic helmet became the primary weapon for blocking and tackling as taught by a new generation of college coaches led by the University of Alabama s Bear Bryant In this cultural history of football at nearly all levels high school college and pro Oriard traces the perennial tension between health and culture regarding football as reflected in what the public read in newspapers magazines and online Through examining how we once felt and how we now feel about the game Oriard challenges us to grapple with the possibility that football might be too violent in an intolerable way
