Companion to Jane Austen and the Arts Hannah Moss, Joe Bray, 2024-05-31 Jane Austen was a keen consumer of the arts throughout her lifetime The Edinburgh Companion to Jane Austen and the Arts considers how Austen represents the arts in her writing from her juvenilia to her mature novels The thirty three original chapters in this Companion cover the full range of Austen s engagement with the arts including the silhouette and the caricature crafts theatre fashion music and dance together with the artistic potential of both interior and exterior spaces This volume also explores her artistic afterlives in creative re imaginings across different media including adaptations and transpositions in film television theatre digital platforms and games **Transmedium** Garrett Stewart, 2018-01-26 If you attend a contemporary art exhibition today you

re unlikely to see much traditional painting or sculpture Indeed artists today are preoccupied with what happens when you leave behind assumptions about particular media such as painting or woodcuts and instead focus on collisions between them and the new forms and ideas that those collisions generate Garrett Stewart in Transmedium dubs this new approach Conceptualism 2.0 an allusion in part to the computer images that are so often addressed by these works A successor to 1960s Conceptualism which posited that a material medium was unnecessary to the making of art Conceptualism 2.0 features artworks that are transmedial that place the aesthetic experience itself deliberately at the boundary between often incommensurable media The result Stewart shows is art whose forced convergences break open new possibilities that are wholly surprising intellectually enlightening and often uncanny *A Postcard History of the Passenger Liner* Christopher

Deakes,2023-10-01 From around 1880 for almost a hundred years shipowners commissioned a wealth of paintings that depicted their magnificent liners as well as the routes they travelled their exotic destinations and life onboard These paintings rich in imagination and atmosphere appeared on postcards and posters of the day and were used to advertise the companies and their ships and so was born a whole genre that produced tens of thousands of paintings which formed a wonderful record of the great era of the passenger liner In 1900 there were over thirty shipping companies operating passenger liners across the North Atlantic Other oceans were similarly served But now with just a few exceptions the companies and their liners have disappeared along with the art they once inspired Little remains to recall this aspect of our maritime past except the postcards and they tell an evocative story of the vanished world of elegant ships and leisurely travel of social and political times much changed by the history of the past century Here brought vividly to life in more than 500 colourful postcards are the ships on which so many of our predecessors sailed as emigrants soldiers administrators or simply as tourists in days long past These cards which are now highly collectable show how steamships developed over the years but they are also a fine tribute to the artists who painted them This volume also includes a glossary of some 170 illustrators which forms an important reference section and advice on collecting

Elevated Rock Art Johan Ling,2014-11-30 How may Bohuslän rock art and landscape be perceived and understood Since the Bronze Age the landscape has been transformed by shore displacement but largely due to misunderstanding and certain ideas about the character of Bronze Age society rock art research in Tanum has drawn much of its inspiration from the present agrarian landscape This perception of the landscape has not been a major issue This volume republished from the GOTAC Serie B Gothenburg Archaeological thesis 49 aims to shed light on the process of shore displacement and its social and cognitive implications for the interpretation of rock art in the prehistoric landscape The findings clearly show that in the Bronze Age the majority of rock art sites in Bohuslän had a very close spatial connection to the sea Much rock art analysis focuses on the contemplative observer The more direct activities related to rock art are seldom fully considered Here the basic conditions for the production of rock art social theory and approaches to image communication symbolism and social action are discussed and related to palpable social forms of the reading of rock art The general location and content of the Bronze Age remains indicate a tendency towards the maritime realm which seems to have included both socio ritual and socio economic matters of production and consumption and that Bronze Age groups in Bohuslän were highly active and mobile The numerous configurations of ship images on the rocks could indicate a general transition or drift towards the maritime realm Marking or manifesting such transitions in some way may have been important and it is tempting to perceive the rock art as traces of such transitions or positions in the landscape All this points to a maritime understanding of Bronze Age rock art in northern Bohuslän

Pointer, 2017-06-09 The history of animated cartoons has for decades been dominated by the accomplishments of Walt Disney giving the impression that he invented the medium In reality it was the work of several pioneers Max Fleischer inventor of the Rotoscope technique of tracing animation frame by frame over live action footage was one of the most prominent By the 1930s Fleischer and Disney were the leading producers of animated films but took opposite approaches Where Disney reflected a Midwestern sentimentality Fleischer presented a sophisticated urban attitude with elements of German Expressionism and organic progression In contrast to Disney's naturalistic animation Fleischer's violated physical laws supporting his maxim If it can be done in real life it isn't animation As a result Fleischer's cartoons were rough rather than refined commercial rather than consciously artistic yet attained a distinctive artistry through Fleischer's innovations This book covers his life and work and the history of the studio that bore his name with previously unpublished artwork and photographs
