Introduction For all those people who want to know more about diabetes this book is going to give you plenty of information
about how people have been surviving with natural remedies down the ages to help cure diabetes Also state of the art
methods of controlling diabetes appeared only in the 20th and 21st century Nobody knew about insulin until the early 20th
century Most of these modern methods of trying to cure diabetes are still being followed by people all over the world because
they are too scared to look at natural remedies Nevertheless for centuries natural remedies have been used to control and
even cure this ages old disease If you are suffering from hyperglycemia increase of glucose in your blood or you are suffering
from glucosuria glycosuria presence of glucose in urine it means you are suffering from diabetes Diabetes can be genetically
inherited or can even be caused due to infection or high blood pressure obesity age heart problems and even mental tension
If you are genetically inclined to diabetes alas there is no cure for this dread disease in scientifically manufactured allopathic
medicines They have just one remedy for it insulin injections But you can try for cures in our natural remedies which have
proven beneficial down the centuries Also people doing plenty of physical exercise have been known not to suffer from
diabetes That is why in olden days it was said to rise up early in the morning with the sun go out in the fresh air and bask in
the rays of the sun This along with physical exercise throughout the day would keep you healthy and happy The logic behind
this mantra is common sense Forget about basking in the sun and all that jazz Concentrate on the term physical exercise In
ancient times the populace worked hard to gather food That is why any carbohydrates and starchy foods they ate were
assimilated by the body really quickly The people suffering from diabetes in these days were those who just lazed about in a
very sedentary lifestyle with absolutely no physical exercise And soon they began to feel very thirsty wanted to drink lots of
water and needed to empty their urinary bladder very often They felt very hungry and even though they ate and ate they lost
weight fast That was because all the sugar content in their body kept being eliminated whenever they emptied their bladders
They also began to get more and more lethargic Well they were now victims of diabetes **Natural Remedies for**
