Art should be colorful and fun

ART

Everything You Need to Know

What is the difference between FINE and APPLIED art?

Fine Art is created with the purpose of creating something intended to be VIEWED.

Fine Art

Applied art is an aesthetic approach to designing something to be USED.

What if I can't draw?

It is okay. You will be exposed to all different types of art in this class. If you try your best and work hard every day you will SUCCEED! Every artist is unique, and many factors go into what makes a work of art a success. You are not graded only on technical skill.

Google Classroom

Every project receives multiple grades during the assignment. You will need to document progress and participation. You will submit photos of your work on Google Classroom on the dates specified in the assignment.

The only way you will do poorly is by not trying.

Why take art?

These are just some of the benefits of creating art. It can:

- relieve stress
- increase positive emotions
- develop creative thinking skills
- challenge creativity
- be FUN!
- help express thoughts, feelings, dreams, goals or anything on your mind
- provides distraction, giving your brain a break from your usual thoughts
- stimulate your brain to grow new neurons
- be therapeutic and meditative
- improve concentration and focus

How am I graded?

50 % participation
50 % projects

You are responsible for:

Your own artwork, at all times, including your name and class period on all assignments. Following all district guidelines, returning all materials at the end of the period and cleaning up on time. You may not take any art materials outside the art room. Bringing a pencil each day!

Materials

All materials, tools, and supplies and dangerous materials, etc. are stored in designated storage areas properly.

Art Syllabus For Middle School:

Arts in Schools, State by State Daniel V. Steinel, 1985 *Studies in Philosophical Realism in Art, Design and Education*
Neil C. M. Brown, 2016-09-13 This book fills a gap in the literature of 21st century international visual arts education by providing a structured approach to understanding the benefits of Philosophical Realism in art education an approach that has received little international attention until now The framework as presented provides a powerful interface between research and practical reconceptualisations of critical issues and practice in the domains of art design and education that involve implications for curriculum in visual arts teaching and learning cognitive development and creativity The book extends understanding of Philosophical Realism in its practical application to teaching practice in visual arts in the way it relates to the fields of art design and education Researchers teacher educators and specialist art teachers are informed about how Philosophical Realism provides insights into art design and education These insights vary from clearer knowledge about art to the examination of beliefs and assumptions about the art object Readers learn how cognitive reflection and social and practical reasoning in the classroom help cultivate students artistic performances and understand how constraints function in students reasoning at different ages stages of education Resources in Education ,2001 **Ben Enwonwu** Sylvester Okwunodu Ogbechie, 2008 An intellectual biography of a modern African artist and his immense contribution to twentieth century art history **Educating in the Arts** Lindy Joubert, 2008-06-19 When I was first asked to edit this book the researcher in me delighted at the opportunity to provide case studies from different cultural traditions with a team of like minded fellow artists educators and researchers But as the book took shape I also discovered a true passion for its fundamental messages Educating in the Arts the Asian Experience talks about how landscapes and histories farms and cities the mountains seas and skies interact with lives and form the backdrop for stories that build and link the creative clusters of a place This book has provided a wonderful opportunity to delve into the many worlds that incorporate the arts particularly where the arts inform inspire and look for answers to difficult questions Having attracted a broad range of contributors from every corner of the Asian region a substantial collection of detailed information has emerged Each story has an approach that is universal yet culturally unique Close your eyes and see the colours smell the smells and hear the voices of the children against the background rhythms of song birds urban traffic or whistling winds **Research in Education** ,1968 Art Education ,1977 Issues for June 1953 June 1955 Oct 1956 are directory issues of the association s membership **Projects to Advance Creativity in Education** ,1969 *Bibliography: the Curriculum, Sources and Materials* Texas State Teachers Association. Office of Education, 1965 Information on Projects to Advance Creativity in Education in the form of a compilation of planning and operational grants Catalog of ERIC Clearinghouse Publications ,1993 John Newsom David Parker, 2005 This biography of an outstanding figure in the post World War II British school system offers new and important insights into the history of education Detailing

Newsom's ideas about the type of schooling children would need after the war it is shown how he quickly coordinated the country's welfare and education services as many thousands of evacuees escaped to Hertfordshire from the German bombing raids on London. His success at a time of accentuated demand for social reform is made apparent explaining his radical school designs which were linked to liberal child centered teaching approaches. Attention is paid to those areas of education particularly close to Newsom's heart the arts outdoor camps and expeditions and the reconciliation of war torn nations through overseas exchanges.
