J. Chambers, 2006 During the 1960s and 1970s a remarkable series of books was produced by academic staff in the field of accounting at the University of Sydney It was a period when academic research was largely analytical rather than empirically based For the most part the interests of academics at Sydney were largely directed at questioning the status quo either in the way accounting or auditing was practiced or in the conventional wisdom expressed in text books of the time The Sydney Accounting Classics series reflects the diversity of interests of the Sydney school at that time It also recognises the tremendous impact of the foundation professor of accounting R J Chambers This reprint series ensures that the ideas developed during this period remain available to new

generations of scholars and researchers The Sydney Accounting Classics series is an initiative of the Accounting Foundation in association with Sydney University Press Securities and Obscurities In this book Chambers presents examples of financial practices in the UK US Canada and Australia and exposes the deficiencies in reported financial information Chambers intended the work to be controversial It continued his contention that precise definitions of accounting terms needed to be agreed upon to ensure that investors company directors auditors and accountants were talking about the same things
