

Ice Accretion and Icing Technology

Robert J. Flemming

Accretion Icing Technology Robert Flemming

David Kirk

Accretion Icing Technology Robert Flemming:

Ice Accretion and Icing Technology Robert J Flemming, 2015-04-16 The effects of inflight atmospheric icing can be devastating to aircraft Universities and industry have been hard at work to respond to the challenge of maintaining flight safety in all weather conditions Proposed changes in the regulations for operation in icing conditions are sure to keep this type of research and development at its highest level This is especially true for the effects of ice crystals in the atmosphere and for the threat associated with supercooled large drop SLD icing This collection of ten SAE International technical papers brings together vital contributions to the subject Icing on aircraft surfaces would not be a problem if a material were discovered that prevented the freezing and accretion of supercooled drops Many options that appeared to have promising icephobic properties have had serious shortfalls in durability This title addresses among other topics the measurement techniques and the drop physics that apply to icing certification for flight through ice crystal clouds and in supercooled large drops improvements in predictive techniques scaling methods test facilities and techniques and rotorcraft icing

Aircraft Thermal Management Mark Ahlers, 2016-05-02 Aircraft thermal management ATM is increasingly important to the design and operation of commercial and military aircraft due to rising heat loads from expanded electronic functionality electric systems architectures and the greater temperature sensitivity of composite materials compared to metallic structures It also impacts engine fuel consumption associated with removing waste heat from an aircraft More recently the advent of more electric architectures on aircraft such as the Boeing 787 has led to increased interest in the development of more efficient ATM architectures by the commercial airplane manufacturers The ten papers contained in this book describe aircraft thermal management system architectures designed to minimize airplane performance impacts which could be applied to commercial or military aircraft Additional information on Aircraft Thermal Management System Architectures is available from SAE AIR 5744 issued by the AC 9 Aircraft Environmental System Committee and the SAE book Aircraft Thermal Management Integrated Analysis PT 178 SAE AIR 5744 defines the discipline of aircraft thermal management system engineering while Aircraft Thermal Management Integrated Analysis discusses approaches to computer simulation of the simultaneous operation of all systems affecting thermal management on an aircraft
