Cyberbullying Ersilia Menesini, Christiane Spiel, 2013-12-19 From the beginning of 2000 with the increase and diffusion of modern technologies a new form of bullying using electronic means has emerged Literature has reached some consistent findings on the description of the problem However there is still a lack of knowledge about developmental processes of cyberbullying and about possible predictors and correlates Some of the main emerging areas investigated in connection with cyberbullying are personality factors callous unemotional traits and self control memory cognitive distortions emotional and moral mechanisms ICT use and media exposure family and social contexts Another important issue is the relation between cyberbullying and face to face bullying From face to face literature we know some of the mechanisms in the peer group such

as the relation between bullying dominance and popularity and the role of bystanders in the social dynamic of the attacks. However, nothing is known about the cyber community. Contributors to this volume attempt to investigate these group mechanisms in the cyber community. The chapters showcased in the volume emphasize the paradoxical Indian sociocultural ethos whose simultaneous embrace of humanism versus identity-based, personalized and hierarchical relationships, materialism versus spiritualism and individualism versus collectivism both fuel yet quell misbehaviour. The inquiries which constitute this book engage both positivist and postpositivist paradigms, draw on several theoretical and substantive frameworks, utilize an array of methods, investigate numerous foci, and cover various geographical regions in India, a range of industrial sectors, and all levels of the organization. In so doing, they make pathbreaking contributions beyond country-specific insights to advance the frontiers of the thematic area worldwide. The chapters include important findings pertaining to digital workplaces, child labour, forgiveness, customer bullying, psychological contract violation, perceived organizational support, psychological capital, and comprehensive prevention strategies encompassing psychosocial risks. As well as building on a decade of knowledge about workplace bullying in India, the book puts forward a research agenda on the topic for the subcontinent in particular and the field in general. The volume is of interest to researchers, practitioners, and students of organizational studies, human resource management, industrial relations, labour law, corporate law, health sciences, and social work.
