Cyberbullying Ersilia Menesini, Christiane Spiel, 2013-12-19 From the beginning of 2000 with the increase and diffusion of modern technologies a new form of bullying using electronic means has emerged Literature has reached some consistent findings on the description of the problem However there is still a lack of knowledge about developmental processes of cyberbullying and about possible predictors and correlates Some of the main emerging areas investigated in connection with cyberbullying are personality factors callous unemotional traits and self control memory cognitive distortions emotional and moral mechanisms ICT use and media exposure family and social contexts Another important issue is the relation between cyberbullying and face to face bullying From face to face literature we know some of the mechanisms in the peer group such

as the relation between bullying dominance and popularity and the role of bystanders in the social dynamic of the attacks. However, nothing is known about the cyber community. Contributors to this volume attempt to investigate these group mechanisms in the cyber community. Finally, for the victims, long-term consequences are also relevant both in terms of perceived stress level and of the association between cyber victimization and mental health. This special issue offers important new findings on the development and consequences of cyberbullying and cyber victimization and opens new and future directions of research.

Indian Perspectives on Workplace Bullying Premilla D'Cruz, Ernesto Noronha, Avina Mendonca, Nidhi Mishra, 2018-11-11. This book recognizing that workplace bullying is a significant employment relations and occupational health and safety problem in India which warrants urgent and holistic intervention presents empirical studies examining contextual factors, antecedents, mediators, moderators, processes, outcomes, and solutions, thereby deepening our understanding of the phenomenon. The chapters showcased in the volume emphasize the paradoxical Indian sociocultural ethos whose simultaneous embrace of humanism versus identity-based, personalized and hierarchical relationships, materialism versus spiritualism and individualism versus collectivism both fuel yet quell misbehaviour. The inquiries which constitute this book engage both positivist and postpositivist paradigms, draw on several theoretical and substantive frameworks, utilize an array of methods, investigate numerous foci, and cover various geographical regions in India, a range of industrial sectors, and all levels of the organization. In so doing, they make pathbreaking contributions beyond country-specific insights to advance the frontiers of the thematic area worldwide. The chapters include important findings pertaining to digital workplaces, child labour, forgiveness, customer bullying, psychological contract violation, perceived organizational support, psychological capital, and comprehensive prevention strategies encompassing psychosocial risks. As well as building on a decade of knowledge about workplace bullying in India, the book puts forward a research agenda on the topic for the subcontinent in particular and the field in general. The volume is of interest to researchers, practitioners, and students of organizational studies, human resource management, industrial relations, labour law, corporate law, health sciences, and social work.

Quality of Life Peter M. Fayers, David Machin, 2016-01-19. The assessment of patient-reported outcomes and health-related quality of life continues to be a rapidly evolving area of research, and this new edition reflects the development within the field from an emerging subject to one that is an essential part of the assessment of clinical trials and other clinical studies. The analysis and interpretation of quality of life assessments relies on a variety of psychometric and statistical methods which are explained in this book in a non-technical way. The result is a practical guide that covers a wide range of methods and emphasizes the use of simple techniques that are illustrated with numerous examples. With extensive chapters covering qualitative and quantitative methods and the impact of guidelines, the material in this new third edition reflects current teaching methods and content widened to address continuing developments in item response theory, computer adaptive testing, analyses with missing data, analysis of ordinal data, systematic reviews, and meta-analysis. This book is aimed at

everyone involved in quality of life research and is applicable to medical and non medical statistical and non statistical readers It is of particular relevance for clinical and biomedical researchers within both the pharmaceutical industry and clinical practice *Adapting to Teaching and Learning in Open-Plan Schools* Vaughan Prain, Peter Cox, Craig Deed, Debra Edwards, Cathleen Farrelly, Mary Keefe, Valerie Lovejoy, Lucy Mow, Peter Sellings, Bruce Waldrip, Zali Yager, 2014-11-26 In recent years many countries have built or renovated schools incorporating open plan design These new spaces are advocated on the basis of claims that they promote fresh productive ways to teach and learn that address the needs of students in this century resulting in improved academic and well being outcomes These new approaches include teachers planning and teaching in teams grouping students more flexibly developing more coherent and comprehensive curricula personalising student learning experiences and providing closer teacher student relationships In this book we report on a three year study of six low SES Years 7 10 secondary schools in regional Victoria Australia where staff and students adapted to these new settings In researching this transitional phase we focused on the practical reasoning of school leaders teachers and students in adapting organisational pedagogical and curricular structures to enable sustainable new learning environments We report on approaches across the different schools to structural organisation of students in year level groupings distributed leadership teacher and pre service teacher professional learning student advocacy and wellbeing use of techno mediated learning personalising student learning experiences and curriculum design and enactment We found that these new settings posed significant challenges for teachers and students and that successful adaptation depended on many interconnected factors We draw out the implications for successful adaptation in other like settings
