Schools, Teachers and Teaching (RLE Edu N) Len Barton, Stephen Walker, 2012-04-27 This volume considers how various sociological approaches to the exploration of the conditions of teachers might be co-ordinated so as to produce a more penetrating and reliable understanding of the main dimensions of teachers' work. Three dimensions are selected for special attention: historical, institutional and interactional contexts in which teachers operate. In different ways the papers in this collection explore the contribution such an investigation of these contexts can make to our understanding of wider educational concerns. *Catalog of Copyright Entries, Fourth Series* Library of Congress. Strategic Management and Business Analysis David Williamson, Peter Cooke, Wyn Jenkins, Keith Michael Moreton, 2013-05-13 Strategic Business Analysis shows students how to carry out a strategic analysis of a business with clear guidelines on where and how to apply the core strategic techniques and models that are the integral tools of strategic management. The authors identify the key questions in strategic analysis and provide an understandable framework for answering these questions. Several case studies are used to focus understanding and enable a more thorough analysis of the concepts and issues, especially useful for students involved with case study analysis. Accompanying the text is a CD-ROM containing the models, tutorial guidance and a PowerPoint presentation. A blank template is provided for each model, enabling students to actively interact and enter their own data, an effective what-if facility. This will enable students to appreciate the limitations as well as the advantages of the strategic models.

The International Economy Peter B. Kenen, 2000-01-13 This text is an introduction to international economics for upper-level undergraduates and above. The first half examines the causes and effects of international trade: how tariffs and other trade policies affect the gains from trade and the ways in which governments try collectively to regulate those policies. The second half deals with monetary matters: the behavior of exchange rates; how trade and capital flows affect the functioning of monetary and fiscal policies; the causes and management of currency crises and the new European monetary union. This fourth edition assesses the outcome of the Uruguay Round of trade negotiations, the work of the new World Trade

Organization WTO and the challenges posed by regional trade blocs A problem set follows each chapter *Mathematical Enculturation* Alan Bishop, 2012-12-06 Mathematics is in the unenviable position of being simultaneously one of the most important school subjects for today's children to study and one of the least well understood Its reputation is awe inspiring Everybody knows how important it is and everybody knows that they have to study it But few people feel comfortable with it so much so that it is socially quite acceptable in many countries to confess ignorance about it to brag about one's incompetence at doing it and even to claim that one is mathophobic So are teachers around the world being apparently legal sadists by inflicting mental pain on their charges Or is it that their pupils are all masochists enjoying the thrill of self inflicted mental torture More seriously do we really know what the reasons are for the mathematical activity which goes on in schools Do we really have confidence in our criteria for judging what's important and what isn't Do we really know what we should be doing These basic questions become even more important when considered in the context of two growing problem areas The first is a concern felt in many countries about the direction which mathematics education should take in the face of the increasing presence of computers and calculator related technology in society *Approach*, 1983 The naval aviation safety review
