EU Mediation Law Handbook Nadja Alexander,Sabine Walsh,Martin Svatos,2017-03-15 Mediation is rapidly becoming a norm in cross border dispute resolution among European Union EU Member States Accordingly an important question for legal advisers to ask themselves is Which jurisdiction offers the best legal framework to support a potential future mediation of my client s dispute This book responds to this question by

examining the law on mediation in each Member State on a chapter by chapter basis Each country analysis applies the book's overarching principle of a specially designed Regulatory Robustness Rating System which is thoroughly explained in an introductory chapter This framework offers a highly effective way to analyse the quality and robustness of each of the EU's twenty nine national jurisdictions legal frameworks relevant to mediation including legislation case law practice directions codes of conduct standards and other regulatory instruments and factor such an analysis into choices about governing law in mediation clauses and other agreements Among the issues and topics covered are the following congruence of domestic and international legal frameworks transparency and clarity of content of mediation laws standards and qualifications for mediators rights and obligations of participants in mediation access to mediation services access to internationally recognised and skilled mediators enforceability of clauses and mediated settlement agreements confidentiality and flexibility admissibility of evidence from mediation in subsequent proceedings impact of commencement of mediation on litigation limitation periods relationship and attitude of courts to mediation and regulatory incentives for legal advisers to engage in mediation This detailed analysis clearly allows users and other regulatory stakeholders to look closely and critically at regulatory regimes for mediation in order to make informed choices and develop appropriate strategies in relation to the law that governs their mediation This is the first book to consider authoritatively what makes good mediation law and what makes a jurisdiction attractive for cross border mediation purposes in terms of its regulatory framework As a resource that identifies potential strengths and weaknesses of each EU Member State's regulatory regime it has no peers and will be welcomed and put to use by the alternative dispute resolution community in Europe and beyond

should be regulated at a national and international level The aim of this book is to promote the understanding and discussion of regulatory issues by presenting comparative research on mediation It describes and analyses the law and practice of mediation in twenty two countries Europe is represented by chapters on mediation in Austria Bulgaria England France Germany Greece Hungary Ireland Italy the Netherlands Norway Poland Portugal and Spain The world beyond Europe is analysed in chapters on mediation in Australia Canada China Japan New Zealand Russia Switzerland and the USA Against this background further chapters on fundamental issues identify possible regulatory models and discuss central principles of mediation law and practice In particular the work considers harmonisation and diversity in the law of mediation as well as the economic and constitutional problems associated with privatising civil justice To the extent available empirical research is used as a point of reference in the critical analysis

Lawyers and Mediation Bryan Clark, 2012-05-24 This book charts the historical and current interaction between lawyers and mediation in both the common law and civil law world and analyses a number of issues relevant to lawyers part in the process Lawyers have in the past and continue to play many roles in the context of mediation While some are champions for the process many remain on the fringes and apathetic while others are openly sceptical or even anti mediation in their stance Yet others may have embraced mediation but it is argued for cynical disingenuous reasons By reviewing existing empirical evidence on lawyers interactions with mediation and by examining historical and current trends in lawyers dalliance with mediation this book seeks to shed new light on a number of related issues including lawyers resistance to mediation lawyers motives for involvement with mediation the appropriateness of lawyers acting as mediators and party representatives and the impact that both lawyers and the increasing institutionalisation of mediation have had on the normative form of the process as well as the impact that mediation experience heralds for lawyers and legal systems in general
