from earlier periods of legal history For each case the facts and the relevant court decision are presented and accompanied by an analytical commentary In addition comparative analyses of the reported cases are provided and a special report is dedicated to how key cases would be resolved under model European rules on tort law The editors believe that the material gathered here may provide guidance for an organic convergence of the national legal systems in Europe It constitutes the basis of an *acquis commun* that is infinitely richer though also much more complex than the rather bland and abstract concepts contained in national codifications European legislation and modern model rules
