Educating Citizen Designers in South Africa Elmarie Costandius, 2018-09-07 Educating Citizen Designers in South Africa is the first book of its kind to appear in post apartheid South Africa and it is therefore both overdue and extremely welcome The book aims at sharing critical citizenship design teaching and learning pedagogies by including contributions from a range of design educators and one student who work in different design disciplines such as architecture graphic and product design Critical citizenship education is explicated in

relation to a range of theories and new and existing models Numerous contemporary case studies and examples of design projects from a range of South African Higher Education Institutions are included As such a variety of perspectives emerge including the consensual where the aim of critical citizenship education is viewed as promoting social justice shared values and critical thinking to the conflicting where critiques are levelled against conceptions of critical citizenship education Contentious contesting and contradictory views are inevitable and necessary given the South African context as it is only in open debate that the one point of agreement among the authors the need for social change can be worked towards Prof Deirdre Pretorius Univeristy of Johannesburg OECD Economic Surveys: South Africa 2015 OECD,2015-07-17 This 2015 OECD Economic Survey of South Africa examines recent economic developments policies and prospects Special chapters cover infrastructure and business regulation tax policy and inclusive growth Doctoral Education in South Africa Nico Cloete,Johann Mouton,2015-12-08 Worldwide in Africa and in South Africa the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade This heightened attention has not only been concerned with the traditional role of the PhD namely the provision of future academics rather it has focused on the increasingly important role that higher education and particularly high level skills is perceived to play in national development and the knowledge economy This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust CHET and the Centre for Research on Evaluation Science and Technology CREST as well as on studies from the rest of Africa and the world In addition to the historical studies new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book The findings presented in Doctoral Education in South Africa pose anew at least six tough policy questions that the country has struggled with since 1994 and continues to struggle with if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030 Discourses framed around the single imperatives of growth efficiency transformation or quality will not however generate the kind of policy discourses required to resolve these tough policy questions effectively What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously **Open Learning as a Means of Advancing Social Justice** Tabisa Mayisela,Shanali Govender,2024-01-23 This volume investigates the uptake of open learning in South African Technical Vocational Education and Training TVET colleges and higher education institutions Comprised of 16 studies focused on activities at a range of colleges and universities across the country these chapters aim to promote a better understanding of open learning practices across the Post School Education and Training PSET sector including issues such as recognition of prior learning access for students with disabilities work integrated learning professional development novel student funding mechanisms leadership for open educational practices institutional culture student support blended and online learning flexible learning online assessment open educational resource development models and funding and micro credentials This collection of peer

It includes a historical and contemporary understanding of the economic, cultural and political obstacles facing PSET, drawing on Nancy Fraser's theory of social justice as participatory parity to better understand the ways in which open learning may address systemic social injustices in order to allow South African students and educators to thrive. Becoming a teacher Josef de Beer, 2020-12-31. This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum or work-integrated learning (WIL), which is an essential component of pre-service teacher education as the elephant in the room. These authors note that the capstone experience in any teacher education programme is the student teaching practicum; after all, this is where the rubber hits the road. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the gap that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4, researchers of the University of Johannesburg disseminate their findings on establishing a teaching school based on Finnish insights in Johannesburg. Chapter 3 highlights the challenges faced in open and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely where safe spaces or laboratories are created for student teachers to learn and grow professionally. These could either be simulations such as software programmes and avatars in the intervention described in Chapter 2, student excursions as the findings in chapters 5, 7 and 10 portray, or alternative approaches to WIL, e.g. Chapters 11 and 12. The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning and self-

directed learning The book makes a unique contribution in terms of firstly its extensive use of Cultural Historical Activity Theory as a research lens and secondly in drawing on various theoretical frameworks Both quantitative and qualitative research informed the findings of the book **Occupational Health Psychology: From Burnout to Well-being at Work**
