Proportionality and Facts in Constitutional Adjudication Anne Carter,2022-01-27 This book considers the relationship between proportionality and facts in constitutional adjudication Analysing where facts arise within each of the three stages of the structured proportionality test suitability necessity and balancing it considers the nature of these facts vis vis the facts that arise in the course of ordinary litigation The book s central focus is on how proportionality has been applied by courts in practice and it draws on the comparative experience of four jurisdictions across a range of legal systems The central case study of the book is Australia where the embryonic and contested nature of proportionality means it provides an illuminating study of how facts can inform the framing of constitutional tests The rich proportionality jurisprudence from Germany Canada and South Africa is used to contextualise the approach of the High Court of Australia and to identify future directions for proportionality in Australia at a time when the doctrine is in its formative stages The book has three broad aims First it considers the role of facts within proportionality reasoning Second it offers procedural insights into fact finding in constitutional litigation Third the book s analysis of the dynamic Australian case law on proportionality means it also serves to clarify the nature and status of proportionality in Australia at a critical moment Since the 2015 decision of *McCloy v New South Wales* where four justices supported the introduction of a structured three part test of proportionality the Court has continued to disagree about the utility of such a test These developments mean that

this book with its doctrinal and comparative approach is particularly timely

Civil Jurisdiction and Judgments Adrian Briggs, 2025-09-30 Now in its 8th edition this well established and respected book by Adrian Briggs continues to deliver a full and complete statement of English law on civil jurisdiction and judgments As the United Kingdom will now not be re joining the Lugano Convention the treatment of judgments from EU Member States and the Lugano States has been reduced and the jurisdictional rules of Brussels Lugano regime are now dealt with only in outline This 8th edition untangles and re ties the loose ends left over from the process of disengagement from the European Union and restates the law of jurisdiction and judgments as it must be understood today Significant new material includes an expanded treatment of the increased opportunities for service out of the jurisdiction with and without permission and of the 2019 Hague Judgments Convention in effect for the United Kingdom from 1 July 2025 Otherwise recent developments of which there have been many across the field of jurisdiction and judgments in civil and commercial matters are examined in proper detail This rigorously updated new edition reasserts its position as an authoritative and comprehensive reference for all lawyers and legal practitioners working in the broad area of commercial litigation

Financial and Non-Financial Determinants of Business Performance: Financial Market and the Real Economy Perspectives Piotr Łasak, 2023-11-14 Running a business today is becoming more complex than two or three decades ago The world is becoming increasingly open and globalized and the production processes of goods and provision of services are inscribed in global supply and value added chains Large corporations are doing well in such a market but small and medium sized enterprises often find it increasingly difficult to function In addition apart from the processes exerting pressure on enterprises operating in the real economy as a result of financial globalization the scope of financial entities banks investment funds stock exchanges was also increasing Knox Hayes Pi tkowski asak 2022 In developed countries enterprises also encounter many challenges related to the traditional corporate finance dimension despite a better situation The current Issue published in the Journal of Entrepreneurship Management and Innovation Volume 19 Issue 4 2023 is aimed at considering the nexus of topics related to the various aspects of the functioning of financial and non financial enterprises The main purpose of the articles is to focus on selected problems related to the financial aspects of business activity The considered problems were presented in the context of contemporary processes taking place in the

environment of enterprises These include on the one hand far reaching digitalization and the use of advanced technologies and on the other hand processes belonging to the Environment Social and Governance ESG area A description of the situation faced by many enterprises including financial institutions undergoing digital transformation is presented in the article written by Asak and Wyci lak 2023 Digitalization processes not only lead to far reaching digitization of enterprises and related dilemmas regarding corporate governance but also the transformation of entire sectors of the industry The banking sector is the best example of this The question arises what is the pattern of behavior of digital platform partners in the situation of transformation of this sector and platformization of banking services The paper aims to present the dynamic pattern of behavior among partners stemming from the tensions between governance costs and co created value within platforms in banking services The study provides a taxonomy of digital platforms in banking highlights the values of the most typical platforms namely blockchain based and cloud based platforms and discusses the potential implications of the platformization of banking services One of the key contemporary perspectives of business activity is looking through the prism of the need for a responsible and sustainable approach This is the perspective embodied in the approach referred to by the term ESG Sustainable business models considering the ESG principles in the company's operation are based on financial and non financial reasons The paper written by Zio o Szaruga and Spoz 2023 aims to examine the relationship between financial and non financial factors in enterprises and indicate for which groups of enterprises the relationship of ESG financial performance is most visible in the context of building sustainable business models and the ability to adapt to sustainability It was found that large enterprises with a solid financial position simultaneously get better non financial results In each of the analyzed aspects large enterprises with an excellent financial standing did better The conclusion presented by Zio o Szaruga and Spoz 2023 does not change the fact that small and medium sized enterprises play a key role in the economic growth of emerging economies The paper by Amoa Gyarteng and Dhliwayo 2023 examines the impact of capital structure and profitability on the short term solvency of nascent SMEs in Ghana building on the liability of the newness framework The study demonstrates that financing decisions and financial performance are crucial mitigating factors for the potential risks of default and failure faced by nascent SMEs Notably the study finds that an appropriate balance between debt and equity financing raises the working capital ratio and thus reduces the liability of newness which is a major challenge faced by nascent SMEs The analysis also identifies that return on equity ROE is a crucial driver of short term solvency for nascent SMEs Declining profitability is manifested by a decrease in operating profits and cash flows The resulting cash flow shortages can cause the company to fall behind on payments and obligations leading to short term insolvency with all the adverse consequences All these conclusions might be valuable for enterprises in other developing countries Operational and financial market performance is a crucial determinant not only for SMEs but also for larger companies Such type of businesses is presented in the paper by Ya ar and Gerede 2023 The article shows how complex are

the processes accompanying the functioning of such enterprises as airlines This paper refers to the competitiveness of such airline companies and the conditions determining their favorable market position and long term competitive advantage The market position of such companies is influenced by such factors like firm maturity its size financial resources and some technical dimensions number of flights fleet homogeneity This means that despite the processes taking place today the business performance of such entities as airlines still depends on the classic factors described in the literature of corporate finance The contemporary opportunities resulting from the dynamic development of information technology contribute to the development of new forms of financing business activity One such form is crowdfunding The paper by Nose and Hosomi 2023 is dedicated to the equity crowdfunding ECF issue in the Japanese context The research provides an answer to the question of what makes equity crowdfunding successful The Signaling Hypothesis and Lack of Financial Literacy Hypothesis were tested Despite the research is focusing more on investors side it also sends an important signal to the business considering crowdfunding as a source of funding The conclusions can be helpful for start ups planning ECF campaigns in the future The company s position on the market may also depend on factors other than financial performance and recently it has depended to an increasing extent on environmental social and governance performance defining corporate sustainability performance In this context very important research thread is the relationship between corporate sustainability performance and stability of dividend payouts This topic is presented in the paper by Matuszewska Pierzynka Mrzyg d and Pieloch Babiarz 2023 The research verifies many detailed interdependencies between the ESG performance of an enterprise and the propensity to pay stable dividends to the enterprise The possibility of financing business activity is determined by the situation in the banking sector The conditions of financing provided by banks are of particular importance in the case of developing countries where other forms of raising capital by enterprises are often limited Shaikh Tunio and Dagar 2023 paper discusses the relationship between banks funding liquidity capital funds and bankers lending activity in emerging markets This research firstly provides insight into the activity of financial companies in emerging markets and secondly informs the public and especially the business about the lending practices of the banking sector and in consequence on the financing opportunities in these economies These unique studies presented in this Issue enrich our knowledge about contemporary business activity The papers contribute to understanding the nature of business performance and link corporate finance issues with other mainly technological and social aspects Particular attention however is paid to the traditional conditions of operation and financing of enterprises At the same time however efforts were made to combine new business conditions including digitization The issues raised also concern processes ensuring sustainable development We want to express the hope that the papers presented here will be of interest to readers scholars and researchers worldwide They provide theoretical concepts and quantitative analyses and indicate pathways for further research Many of the presented areas require further in depth analysis
