Gran Bretagna e Italia tra Mediterraneo e Atlantico: Livorno - 'un porto inglese' / Italy and Britain between Mediterranean and Atlantic worlds: Leghorn - 'an English port' Hugo Blake, 2017-09-08 Livorno fu una creazione

postmedievale di notevole successo. Diventò il più grande porto di transito del Mediterraneo e creò il concetto di porto franco in Europa. Costruita dai Granduchi Medici prosperò come la più importante base commerciale nel Mediterraneo per i Poteri nord atlantici. Tra questi il principale fu inglese, la cui Royal Navy garantì il suo successo commerciale e il predominio britannico nel Mediterraneo, un'area che era ancora la fonte di prodotti e beni di lusso e che forniva un mercato popoloso per le manifatture, i metalli, il pesce, le riesportazioni coloniali ed i servizi di trasporto inglesi. Questo volume raccoglie quattordici contributi che danno prove materiali della relazione della Gran Bretagna con Livorno e la Toscana. Livorno was a remarkably successful post medieval creation which became the greatest transit port in the Mediterranean and pioneered the concept of the free port in Europe. Built by the Medici Grand Dukes it prospered as the main commercial base in the Mediterranean for north Atlantic powers. Principal amongst these were the English whose Royal Navy ensured their commercial success and Britain's dominance of the Mediterranean, an area which was still the source of luxury produce and goods and provided a populous market for British manufactures, metals, fish, colonial re-exports and shipping. This volume brings together fourteen papers highlighting the material evidence of Britain's relationship with Livorno and Tuscany. Seoul Ross King, 2018-02-28. Seoul is a colossus both in its physical presence and the demand it places on any intellectual effort to understand it. How did it come to be? How can a city this immense work? Underlying its spectacle and incongruities is a city that might be described as ill at ease with its own past. The bitter rifts of Japanese colonization persist as does the troubled aftermath of the Korean War and its divisions. The economic Miracle on the Han that followed is crosscut by memories of the violent dictatorship that drove it. In Seoul, author Ross King interrogates this contested history and its physical remnants, tacking between the city's historiography and architecture with attention to monuments, streets and other urban spaces. The book's structuring device is the dichotomy of erasure and memory as necessary preconditions for reinvention. King traces this phenomenon from the old dynasties to the Japanese regime and wartime destruction; he then follows the equally destructive reinvention of Korea under dictatorship to the brilliant city of the present with its extraordinary explosion of creativity and ideas, the post 1991 Hallyu, the Korean Wave. The final chapter returns to questions of forgetting and memory but now as conditions of possibility for what would seem to underlie the present trajectory of this extraordinary city and culture. Seoul can be read, King suggests, in the context of the hybrid ideas that have characterized Korean cultural history. It may be their present eruption that accounts for the city of contradictions that confronts the contemporary observer and that most extraordinary of Korean phenomena, the rise of an alternative virtual world eclipsing both city and nation. Has the very idea of Korea been reinvented even as the weakly defined nation state slips away? *Efficient Biosynthesis of Organic Acids from Renewable Materials* Hui Wu, Yu Deng, Rongming Liu, 2021-08-03. **Power of Reading** Frank Furedi, 2015-10-08. Here is a natural companion to Christopher Booker's bestselling *The Seven Basic Plots*. Continuum and John Gross's seminal study *The Rise and Fall of the Man of Letters*. Weidenfeld and Nicolson. The most eminent cultural and social historian Frank Furedi presents an eclectic and entirely

original history of reading The very act of reading and the choice of reading material endow individuals with an identity that possesses great symbolic significance Already in ancient Rome Cicero was busy drawing up a hierarchy of different types of readers Since that time people have been divided into a variety of categories literates and illiterates intensive and extensive readers or vulgo and discreet readers In the 19th Century accomplished readers were praised as men of letters while their moral opposites were described as unlettered Today distinctions are made between cultural and instrumental readers and scorn is communicated towards the infamous tabloid reader The purpose of this book is to explore the changing meanings attributed to the act of reading Although it has an historical perspective the book's focus is very much on the culture of reading that prevails in the 21st Century There are numerous texts on the history of literacy Hoggart yet there is no publication devoted to the the history of readers and their relationship with wider culture and society It is thus a fascinating insight into understanding the post Gutenberg debates about literacy in a multimedia environment with such a strong emphasis on the absorption of information Taking a cue from George Steiner Furedi argues vigorously for the restoration of the art of reading every bit as important as the art of writing
