Casimir, 2009 Today human ecology has split into many different sub disciplines such as historical ecology political ecology or the New Ecological Anthropology The latter in particular has criticised the predominance of the Western view on different ecosystems arguing that culture specific world views and human environment interactions have been largely neglected However these different perspectives only tackle specific facets of a local and global hyper complex reality In bringing together a variety of views and theoretical approaches these especially commissioned essays prove that an interdisciplinary collaboration and understanding of the extreme complexity of the human environment interface s is possible
