management field both in terms of theoretical contribution and practical impact It is intended to be accessible to a range of readers presenting technical materials in an informal way Finally it is introductory in that it assumes no previous knowledge of the academic management field

School for Young Children Charles H. Wolfgang, Mary E. Wolfgang, 1992 What is the definition of play and the play curriculum What tools and means are used to assess play development How is a play classroom organized What is the role of the teacher or caregiver in the play process These are the four fundamental questions addressed by Wolfgang and Wolfgang in this practical hands on book This clearly written practical book focuses on teaching young children through a play curriculum Utilizing methods and techniques that are solidly based in developmentally appropriate theory and research the text omits large sections of abstract theoretical material so as to encourage the practical application of concepts Moreover most chapters provide a list of practical activities enabling readers to apply chapter ideas to real life situations Charts classroom maps checklist of materials and new assessment instruments enable readers to easily apply the educational principles and practices Early childhood educators administrators school counselors day care workers and parents

Landscape Lab Fabio Bianconi, Marco Filippucci, 2019-01-05 This book explores the relationship between the sciences of representation and the strategy of landscape valorisation The topic is connected to the theme of the image of the city which is extended to the territory scale and applied to case studies in Italy's Umbria region where the goal is to strike a dynamic balance between cultural heritage and nature The studies demonstrate how landscape represents an interpretive process of finding meaning a product of the relationships between mankind and the places in which it lives The work proceeds from the assumption that it is possible to describe these connections between environment territory and landscape by applying the Vitruvian triad composed of Firmitas solidity Utilitas utility and Venustas beauty The environment the sum of the conditions that influence all life represents the place's solidity because it guarantees its survival In turn territory is connected to utility and through its etymological meaning is linked to possession to a domain while landscape as an area perceived by people expresses the search for beauty in a given place the process of critically interpreting a vision
