Andreas Marc Fischer,Janette Bessembinder,Fai Fung,Hans Olav Hygen ,Katharine Jacobs,2024-07-04 Climate change is under way in full extent adversely affecting more and more facets in nature society and economy The observations and the projections of these changes are increasingly important to consider in long term planning given the need to adapt to the

multi sectoral climate impacts that can be anticipated In most cases it is the information on the local scale in a user oriented way that is most relevant in this context Over recent years many countries and organisations have set up climate services such as factsheets brochures web tools data to enable downstream applications and to form a decision support basis for climate action planning e g KNMI14 in the Netherlands UKCP18 in the UK CH2018 in Switzerland Climate Change in Australia NCA4 in the US Copernicus Climate Data Store C3S

**Orphan Crops: Breeding and Biotechnology for Sustainable Agriculture, Food and Nutrition** Simon E. Bull, Jill Margaret Farrant, Rita Hogan Mumm, Zerihen Tadele, 2024-01-18 Orphan crops play an important role in food and nutrition security especially in growing economies where small holder farmers produce the majority of food Despite their importance in global agriculture and their often remarkable nutrient content and adaptation to challenging environmental conditions orphan crops have received limited attention by the scientific community and industry However the diversity of neglected plant species provides a large genetic resource that could significantly contribute to broadening the biodiversity of trait desired crops for novel value chains sustainable development and food security The uptake of new plant breeding techniques notably genome editing as well as omic tools are now accelerating translation of basic research and facilitating the exploration of orphan crops These advancements also give rise to public and politic engagement discussions to maximize socio economic impact Given that the greatest need for food and nutritional security is in growing economies issues of food sovereignty and sustainability of their food systems become front and centre There is now an exceptional opportunity to tackle some of the major current challenges in agriculture including climate change sustainable cropping systems food quality and nutritional security through broadening research in wild relatives of crops and on orphan species This Research Topic seeks to showcase research on neglected plants using advanced molecular technologies e g genome sequencing omics etc and new plant breeding approaches methods and tools This Research Topic will also discuss the challenges and opportunities arising when modern breeding techniques are applied for translational research

**Kenya Engineer** ,2005 **China's New Sources of Economic Growth: Vol. 2** Ligang Song, Ross Garnaut, Cai Fang, Lauren Johnston, 2017-07-20 China s efforts in searching for new sources of growth are increasingly pressing given the persistence of the growth slowdown in recent years This year s book elucidates key present macroeconomic challenges facing China s economy in 2017 and the impacts and readiness of human capital innovation and technological change in affecting the development of China s economy The book explores the development of human capital as the foundations of China s push into more advanced growth frontiers It also explores the progress of productivity improvement in becoming the primary mechanism by which China can sustain economic growth and explains the importance of China s human capital investments to success on this front The book demonstrates that technical change is a major contributor to productivity growth and that invention and innovation are increasingly driving technical change but so far lumpily across regions sectors and invention motivations Included are chapters providing an update on reform and

macroeconomic development educational inequality the role of intangibles in determining China's economic growth and China's progress in transitioning towards being an innovative country The book also covers the regional dimension of innovation and technological progress by sector in agricultural productivity renewable energy and financial markets Chapters on trade investment regional cooperation and foreign aid explore further the mechanisms through which technological change and innovative activities are emerging locally and internationally

**Building Innovation Capabilities for Sustainable Industrialisation** Rasmus Lema, Margrethe Holm Andersen, Rebecca Hanlin, Charles Nzila, 2021-11-15 This book argues that renewable electrification in developing countries provides important opportunities for local economic development but new pathways are required for turning these opportunities into successful reality Building Innovation Capabilities for Sustainable Industrialisation offers a novel input into the debate on development of capabilities for sustainable industrialisation and delivers key insights for both researchers and policy makers when it comes to the question of how to increase the economic co-benefits of renewables expansion The chapters in the book use a tailored analytical framework in their studies of renewable electrification efforts in Kenya and other countries in sub-Saharan Africa They draw on a mix of project sector and country level case studies to address questions such as What capabilities are developed through on-going renewable electrification projects in developing economies How can the expansion of renewable electrification be supported in a way that also encourages sustainable economic development What role do international linkages South-South and North-South play and what role should they play in the greening of energy systems in developing economies The authors provide a new understanding of how green transformation and sustainable industrialisation can be combined highlighting the opportunities and constraints for local capability building and the scope for local policy action This book will be of great interest to students and scholars of development studies energy studies sustainability and sustainable development as well as practitioners and policy makers working in development organisations and national governments The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781003054665> has been made available under a Creative Commons Attribution Non-Commercial No Derivatives 4.0 license

The main focus of this book is to help better understand the multidimensionality and complexity of population displacement and the role that reconstruction and recovery knowledge and practice play in this regard According to the UN Refugee Agency UNHCR the total number of people forcibly displaced due to wars and conflicts disasters and climate change worldwide exceeded 66 million in 2016 Many of these displaced populations may never be able to go back and rebuild their houses communities and businesses This text brings together recovery and reconstruction professionals researchers and policy makers to examine how displaced populations can rebuild their lives in new locations and recover from disasters that have impacted their livelihoods and communities This book provides readers with an understanding of how disaster recovery and reconstruction knowledge and practice can contribute to the recovery and reconstruction of displaced and refugee populations This book will appeal to students researchers and professionals working in the field      **Africa and Sustainable**

**Global Value Chains** Regina Frei,Sherwat Ibrahim,Temidayo Akenroye,2022-02-07 This book contains a collection of studies on the interactions between businesses in Africa and Global Value Chains GVCs in terms of social environmental and economic sustainability This is particularly pertinent given the asymmetrical power distribution between the global buyer and the African supplier their governance relationships and the ongoing competitive pressures to reduce costs and increase flexibility to meet GVC demands Rather than focusing on the sustainability of a single organization GVCs address the sustainability of inter firm value chains and global industries as a whole With little differentiation between value chain creation and social environmental degradation extending to people and raw material extraction upstream and disposal or recycling downstream sustainability issues need to be at the forefront of African business research interests Nowadays sustainability is considered a competitive advantage for a firm looking to join a GVC Whether sustainability is approached from the viewpoint of an exporting firm motivated to join a GVC in its respective industry or whether a firm s continuing contractual or collaborative relationship with a buyer depends on its compliance with sustainability standards both approaches focus on the ability of firms in Africa to benefit from joining sustainable GVCs      **Handbook of Thermoset**
