Discipline Problems Tadashi Dozono, 2024-05-07 Angel a Black tenth grader at a New York City public school self identifies as a nerd and likes to learn But she s troubled that her history classes leave out events like the genocide and dispossession of Indigenous people in the Americas presenting a sugar coated image of the United States that is at odds with her everyday experience The history I learned in school is simpler she says The world I live in is a lot more complex Angel like every student interviewed in Discipline Problems has been identified by teachers as a troublemaker a student whose behavior disrupts classroom norms and interferes with instruction But her critiques of the curriculum she s taught speak to her curiosity and insight crucial foundations for understanding history Like many students who have been marginalized by systemic racism in American schools she exposes the shortcomings of her classrooms academic environments by challenging both the content and the methods of her education All too often these challenges are framed as troublemaking and the students are disciplined for acting out instead of being rewarded for their intellectual engagement Tadashi Dozono a professor of education and former high school social studies teacher takes seriously the often overlooked critiques that students of color who get labeled as troublemakers direct toward their high school history curriculum He reinterprets troublemaking usually cast as a behavioral deficit as an intellectual asset and form of reasoning that challenges the disciplining reason of classrooms where whiteness is valued over the histories and knowledge of people of color Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to educational practices that marginalize non white students Discipline Problems reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the curiosity intellect and knowledge of marginalized learners

Village of Immigrants Diana R. Gordon, 2015-11-06 Greenport New York a village on the North Fork of Long Island has become an exemplar of a little noted national trend immigrants spreading beyond the big coastal cities driving much of rural population growth nationally In Village of Immigrants Diana R Gordon illustrates how small town America has been revitalized by the arrival of these immigrants in Greenport where she

lives Greenport today boasts a population that is one third Hispanic Gordon contends that these immigrants have effectively saved the town s economy by taking low skill jobs increasing the tax base filling local schools and patronizing local businesses Greenport s seaside beauty still attracts summer tourists but it is only with the support of the local Latino workforce that elegant restaurants and bed and breakfasts are able to serve these visitors For Gordon the picture is complex because the wave of immigrants also presents the town with challenges to its services and institutions Gordon s portraits of local immigrants capture the positive and the negative with a cast of characters ranging from a Guatemalan mother of three including one child who is profoundly disabled to a Colombian house painter with a successful business who cannot become licensed because he remains undocumented Village of Immigrants weaves together these people s stories fears and dreams to reveal an environment plagued by threats of deportation debts owed to coyotes low wages and the other bleak realities that shape the immigrant experience even in the charming seaport town of Greenport A timely contribution to the national dialogue on immigration Gordon s book shows the pivotal role the American small town plays in the ongoing American immigrant story as well as how this booming population is shaping and reviving rural communities

Highsmith,2016-12-30 Flint Michigan is widely seen as Detroit s Detroit the perfect embodiment of a ruined industrial economy and a shattered American dream In this deeply researched book Andrew Highsmith gives us the first full scale history of Flint showing that the Vehicle City has always seen demolition as a tool of progress During the 1930s officials hoped to renew the city by remaking its public schools into racially segregated community centers After the war federal officials and developers sought to strengthen the region by building subdivisions in Flint s segregated suburbs while GM executives and municipal officials demolished urban factories and rebuilt them outside the city City leaders later launched a plan to replace black neighborhoods with a freeway and new factories Each of these campaigns Highsmith argues yielded an ever more impoverished city and a more racially divided metropolis By intertwining histories of racial segregation mass suburbanization and industrial decline Highsmith gives us a deeply unsettling look at urban industrial America *Building a Culture of Hope* Robert D. MOOCs, High Technology, and Higher Learning Robert A. Rhoads, 2015-10-30 The first book to explore the rise of MOOCs through a social science lens In MOOCs High Technology and Higher Learning Robert A Rhoads places the OpenCourseWare OCW movement into the larger context of a revolution in educational technology In doing so he seeks to bring greater balance to increasingly polarized discussions of massively open online courses MOOCs and show their ongoing relevance to reforming higher education and higher learning Rhoads offers a provocative analysis of a particular moment in history when cultural political and economic forces came together with evolving teaching and learning technologies to bring about the MOOC He argues persuasively that the OCW and MOOC movements have had a significant impact on the digitalization of knowledge and that they have helped expand the ways students and teachers interact and develop ideas collaboratively He also critically analyzes the extensive media coverage of MOOCs while examining empirical studies of MOOC content delivery the organizational system supporting the OCW MOOC movement and faculty labor concerns Too often technology advocates champion the MOOC movement as a solution to higher education's challenges without recognizing the pedagogical social and economic costs MOOCs High Technology and Higher Learning challenges many of the democratic claims made by MOOC advocates pointing to vast inequities in the ways MOOCs are presented as an alternative to brick and mortar access for low income populations This book offers a clear eyed perspective on the potential and peril of this new form of education

Out of the Dark Wendy Leigh Samford, 2016-07-12 Out of the Dark is a call for teacher leaders to take a stand against the current neoliberal take over of our educational system today This book investigates where this political power hold began theorizes why is it so hard for us to change what is happening and then explores theory into practice for supporting the development of a democratic curriculum Out of the Dark highlights example schools in various states that are fighting the monopoly of standardization by implementing their own version of visionary democratic education This book is purposefully heavy on references as to encourage teachers to become curriculum leaders through research and complicated conversation that they have with themselves and with each other It is time to stand together against the over utilization and magnified importance of standardized testing in our educational system in the United States The time is now to envision a democratic education based on an eclectic compilation of curriculum theory and fight for the significant educational contribution of our own professional wisdom prompting democratic empowerment for our students
