It explains both the how and the why of innovation, its economic and policy context, as well as the techniques by which it can be orchestrated along with the management systems needed to govern it. Innovation is uniquely presented through both a private sector value creating and public sector mission fulfilling lens. Topics covered in context include modern innovation and creativity techniques such as design thinking and the Lean Startup, the organizational challenges of innovation as well as innovation project and portfolio management techniques. Business model innovation and open innovation complete the picture from the manager's perspective. Government innovation policy is discussed in its historical and contemporary context and the innovation policy toolset is introduced. Continual innovation is vital for companies and countries to prosper. Readers will learn why innovation must follow technological breakthroughs to raise productivity and economic growth and how innovation when done right can benefit larger society. An explanation for unequal growth that some companies, regions and countries are not seeing the full productivity gains promised by modern technology is explored in the context of technology diffusion.
