The Concept of Cultural Genocide Elisa Novic,2016 Cultural genocide is the systematic destruction of traditions values

language and other elements that make one group of people distinct from another Cultural genocide remains a recurrent topic appearing not only in the form of wide ranging claims about the commission of cultural genocide in diverse contexts but also in the legal sphere as exemplified by the discussions before the International Criminal Tribunal for the Former Yugoslavia and also the drafting of the UN Declaration on the Rights of Indigenous Peoples These discussions have however displayed the lack of a uniform understanding of the concept of cultural genocide and thus of the role that international law is expected to fulfil in this regard The Concept of Cultural Genocide An International Law Perspective details how international law has approached the core idea underlying the concept of cultural genocide and how this framework can be strengthened and fostered It traces developments from the early conceptualisation of cultural genocide to the contemporary question of its reparation Through this journey the book discusses the evolution of various branches of international law in relation to both cultural protection and cultural destruction in light of a number of legal cases in which either the concept of cultural genocide or the idea of cultural destruction has been discussed Such cases include the destruction of cultural and religious heritage in Bosnia and Herzegovina the forced removals of Aboriginal children in Australia and Canada and the case law of the Inter American Court of Human Rights in relation to Indigenous and tribal groups cultural destruction

important roles in fostering consumer demand particularly during the Depression the Second World War and throughout the postwar era Dawson draws upon promotional pamphlets newspapers advertisements and films as well as archival sources regarding government civic and international tourism organizations Central to his book is an examination of the representation of popular imagery and of how aboriginal and British cultures were commodified and marketed to potential tourists He also looks at the gendered aspect of these promotional campaigns particularly during the 1940s and challenges earlier interpretations regarding the relationship between tourism and nature in Canada Historians have tended to focus on either the first wave of consumerism from the 1880s to the 1920s or else on the era of economic expansion that followed World War Two As Dawson shows the 1930-45 period in particular was an important and dynamic one in the creation of Canadian and British Columbian consumer culture Michael Dawson's highly readable and engaging account of the development of the British Columbia tourist industry will be welcomed by British Columbian and Canadian historians as well as other scholars of tourism and consumerism
