

Exterior Trim

Extensive changes to the exterior compliment the restyled body.

Bumpers

The front and rear bumpers are body colored, fully integrated bumper and spoiler assemblies. The front bumper also incorporates an under-tray. Apertures in the bumpers accommodate fog lights, direction indicator lights and side marker lights/reflectors (see Electric/Electronic - Lighting section for further details). Brake cooling ducts are incorporated in the front bumper. Where specified, the left cooling duct contains an ambient air temperature sensor for the climate control system, and the right cooling duct contains an ambient air temperature sensor for the heaters in the powerwash jets of the headlamp washers; the powerwash jets are mounted in new covers on the top surface of the bumper section.

The bumpers are manufactured from polyurethane plastic, around a horizontal beam, and have chromed, stainless steel blades on the top surface of the bumper section. On North American vehicles the beam is made from aluminum, on all other market vehicles the beam is made from plastic. Replacement bumpers are painted in primer, ready for finishing with the standard paint system.
