McAfee, Yvette d'Entremont, 2017-08-22 While belief in religious supernatural claims is waning throughout the West evidence suggests belief in nonreligious supernatural claims is on the rise What explains this contradiction How can a society with a falling belief in God have a rising belief in ghosts psychic powers ancient astronauts and other supernatural or pseudo scientific phenomena Taking the same anthropological approach he employed in his notable studies of religion atheist author and activist David G McAfee turns his attention to nonreligious faith based claims Whether going undercover as a medium getting tested at Scientology headquarters in Los Angeles or interviewing celebrity paranormalists and famous skeptics he leaves no stone unturned in his investigation As in the case of religion he finds an unwillingness among believers to critically examine their most closely held convictions Only once individuals honestly assess their own sacred cows will they be able to ensure that their beliefs conform to the known facts and that our decisions as a society are based on the best available evidence

Pseudoscience Allison B. Kaufman, James C. Kaufman, 2019-03-12 Case studies personal accounts and analysis show how to recognize and combat pseudoscience in a post truth world In a post truth fake news world we are particularly susceptible to the claims of pseudoscience When emotions and opinions are more widely disseminated than scientific findings and self proclaimed experts get their expertise from Google how can the average person distinguish real science from fake This book examines pseudoscience from a variety of perspectives through case studies analysis and personal accounts that show how to recognize pseudoscience why it is so widely accepted and how to advocate for real science Contributors examine the basics of pseudoscience including issues of cognitive bias the costs of pseudoscience with accounts of naturopathy and logical fallacies in the anti vaccination movement perceptions of scientific soundness the mainstream presence of integrative medicine hypnosis and parapsychology and the use of case studies and new media in science advocacy Contributors David Ball Paul Joseph Barnett Jeffrey Beall Mark Benisz Fernando Blanco Ron Dumont Stacy Ellenberg Kevin M Foltz Christopher French Ashwin Gautam Dennis M Gorman David H Gorski David K Hecht Britt Marie Hermes Clyde F Herreid Jonathan Howard Seth C Kalichman Leif Edward Ottesen Kennair Arnold Kozak Scott O Lilienfeld Emilio Lobato Steven Lynn Adam Marcus Helena Matute Ivan Oransky Chad Orzel Dorit Reiss Ellen Beate Hansen Sandseter Kavin Senapathy Dean Keith Simonton Indre Viskontas John O Willis Corrine Zimmerman *Ideological and Political Bias in Psychology* Craig L. Frisby, Richard E. Redding, William T. O'Donohue, Scott O. Lilienfeld, 2023-09-13 This book examines the traditional assumptions made by academics and professionals alike that have embedded sociopolitical biases that impede practice and undermine efforts to achieve an objective scientific status If allowed to go unchallenged the credibility of psychology as a

discipline is compromised This contributed volume thoroughly and comprehensively examines this concern in a conceptually and empirically rigorous manner and offers constructive solutions for minimizing undue political influences within the field of psychology Societies in the 21st century desperately need reliable psychological science but we don't have it This important volume explains one of the main reasons why we are making little progress on any issue that gets contaminated by the left right culture war because the field of psychology is an enthusiastic member of one of the two teams so it rejects findings and researchers who question its ideological commitments The authors of this engaging volume also show us the way out They diagnose the social dynamics of bias and point to reforms that would give us the psychology that we need to address 21st century problems Jonathan Haidt Thomas Cooley Professor of Ethical Leadership NYU Stern School of Business and author of The Righteous Mind The boundaries of free speech censorship moral cultures social justice and ideological biases are among the many incendiary topics discussed in this book If you are looking for a deep dive into real world contemporary controversies Ideological and Political Bias in Psychology fits the bill The chapters are thoughtful and thought provoking Most readers will find something to agree with and something to rage at in almost every chapter It just may change how you think about some of these topics Diane F Halpern Professor of Psychology Emerita Claremont McKenna College and Past President American Psychological Association Unless the political left is always correct about everything in which case we wouldn't need to do research we could just ask a leftist the growing political monoculture of social science is a major barrier to our search for the truth This volume shows how ideological bias should be treated as a source of research error up there with classic methodological flaws like non random assignment and non blind measurement Steven Pinker Johnstone Professor of Psychology Harvard University and the author of Rationality An important read for academics curious about how their politics fashions beliefs that too often are uncritically taken for granted and for non academics wondering why we can't shake off the politics that so influences scientific work Vernon Smith Nobel Laureate in Economic Sciences and George L Argyros Chair in Finance and Economics Chapman University Advances and deepens empirically rigorous scholarship into biased political influences affecting academic and professional psychology Offers constructive solutions for minimizing undue political influences within psychology and moving the field forward Serves as a resource for psychological academicians researchers practitioners and consultants seeking to restore the principles of accurate science and effective practice to their respective areas of research
