Enhancing Competitiveness in Small Developing States Robert A. Stoddard, 2024-08-15 This book is designed to help students, practitioners, and policy makers gain an understanding of the existential challenges that confront small developing states that have resulted in several economic fallouts to the extent that some countries have experienced the demise of many of their traditional industries. It also presents a compendium of approaches, tools, and policies that can assist in resolving some of the lingering challenges faced by these countries. It is envisaged that these approaches will invariably increase their competitiveness and thereby contribute to economic growth. The book also analyzed the policy and regulatory environment in several small developing states and has developed approaches that are critical to strengthening the institutional capacity in support of the SME sector. This is an imperative in their quest to become more productive and competitive and thereby create opportunities for sustained economic growth. Emanating from a regional study of the industrial status in the CARICOM Member States, it proposes new and revised approaches to public policy on many development issues. The book is replete with insights, inspiring real-life cases, and offers alternative approaches to development. **International Perspectives on**

Cole,2000-06-30 There has been an explosion of Web based courses in higher education Aiming at an interdisciplinary audience the contributors draw upon diverse philosophical and empirical backgrounds to make claims about Web based pedagogy Among the points they raise is the concern that education is more easily commodified through Internet technologies implying that traditional faculty roles in teaching and research are at risk Moreover current understandings of what it means to be a teacher or a student are undergoing redefinition as a result of these new distance learning technologies The contributors note that Web based pedagogy is associated with sound instruction when particular strategies are adopted As a corollary this form of teaching is least effective when attempts are made to directly translate traditional styles of teaching Political social and economic interests are competing to shape the direction that online education will take The authors argue that opportunities exist for administrators and faculty to define the terms under which Web based learning will occur in their institutions Front-End Vision and Multi-Scale Image Analysis Bart M. Haar Romeny,2008-10-24 Many approaches have been proposed to solve the problem of finding the optic flow field of an image sequence Three major classes of optic flow computation techniques can discriminated see for a good overview Beauchemin and Barron IBeauchemin19951 gradient based or differential methods phase based or frequency domain methods correlation based or area methods feature point or sparse data tracking methods In this chapter we compute the optic flow as a dense optic flow field with a multi scale differential method The method originally proposed by Florack and Nielsen Florack1998a is known as the Multiscale Optic Flow Constrain Equation MOFCE This is a scale space version of the well known computer vision implementation of the optic flow constraint equation as originally proposed by Horn and Schunck Horn1981 This scale space variation as usual consists of the introduction of the aperture of the observation in the process The application to stereo has been described by Maas et al Maas 1995a Maas 1996a Of course difficulties arise when structure emerges or disappears such as with occlusion cloud formation etc Then knowledge is needed about the processes and objects involved In this chapter we focus on the scale space approach to the local measurement of optic flow as we may expect the visual front end to do 17 2 Motion detection with pairs of receptive fields As a biologically motivated start we begin with discussing some neurophysiological findings in the visual system with respect to motion detection *Building Performance Simulation for Design and Operation* Jan L.M.
