4. Do not install humidifier level above recommended or to recommended level if condensation needs to create windows of any unheated space, as condensation damage may result. Excess humidity can cause moisture accumulation which can allow the possibility for mold growth in the home.

5. Do not connect Model 500 transformer to blower motor wiring. Premature component failure may result.

6. When installing humidifier on downflow furnace, ensure bypass continues to run after a heat call is satisfied to eliminate high temperatures from damaging the humidifier.
